Subject: PUBLIC COMMENT ON DRAFT CRITERIA ON MANUAL ACTIONS TO
 ACHIEVE POST-FIRE SAFE SHUTDOWN

Dear NRC Staffers:

It is totally unacceptable to relax enforcement of current
 fire codes for non-compliant reactor operators. In view
 of the near catastrophic fire at Browns Ferry in 1975,
 such a change in policy would clearly create unacceptable and undue risks
 to public health,
 public safety and to
 the environment in the event of fires at nuclear plants.
