Hello,

Please do not relax any nuclear standards, particularly fire ones, as they have been too frequent.

Until we have a safe disposal for nuclear waste, I am for a non-nuclear future. It makes a zero sense to continue creating a hazard fatal to the human race.

Further, the nuclear industry lines the pockets of the elite at the expense of us all. Not good.

Further, the people have been clamoring for renewable energy long enough. Spend our money on developing renewables, please.

Further, local everything is what makes safe sense in the Age of Terrorism. Unwise decisions have created this unhealthy civilization and we are spiraling towards the same situation as Israel/Palestine.

Thank you for prudence,

Barbara Vaile
