**Subject:** Proposal to relax enforcement of fire codes

11/26/03

68 FR 66501

120

I just learned that the NRC is proposing to relax enforcement of industry-wide fire codes violations (Chapter 10 Code of Federal REgulation Part 50 Appendix R Section III G.2)

I urge you NOT to relax enforcement of these codes. My parents live near a nuclear power plant, and I am very concerned. To make a nuclear power plant less safe is an insane thing to do. The only reason this could happen is because money and profit, not the safety of human lives is the bottom line. What does this say about the industry and those regulating it? Please, please make our nuclear power plants more safe, not less safe. Please show us you care about people and their well-being.

Thank you.
