NEW NRC RESIDENT INSPECTOR ASSIGNED TO SEABROOK NUCLEAR PLANT

Steve W. Shaffer has been assigned as the new Nuclear Regulatory Commission resident inspector at the Seabrook nuclear power plant. He joins NRC Senior Resident Inspector Glenn Dentel at the plant, located in Seabrook, N.H. Shaffer replaces Javier Brand who was reassigned as the resident inspector at the Three Mile Island nuclear plant in Middletown, Pa.

Mr. Shaffer joined the NRC in 1993 as a health physicist in the Region I Division of Nuclear Materials. In 2002, he became a project engineer in the Region I Division of Reactor Projects and has worked as a resident inspector at the Oyster Creek nuclear plant in Lacey Township, N.J.

Mr. Shaffer earned a bachelor's degree in environmental engineering technology and a master's degree in environmental health from Temple University in Philadelphia.

The Seabrook resident inspectors can be reached at 603/474-3589.

Each U.S. commercial nuclear plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting inspections, monitoring major work projects and interacting with plant workers and the public.
