WITHDRAWAL OF LICENSE AMENDMENT REQUEST (LAR) DATED October 31, 2003 CHANGES TO TECHNICAL SPECIFICATIONS TO IMPLEMENT NEI 97-06, "STEAM GENERATOR PROGRAM GUIDELINES", AND INSPECTION REQUIREMENTS ASSOCIATED WITH THE UNIT 1 REPLACEMENT STEAM GENERATORS, TAC NUMBERS MC1212 AND MC1213

By letter dated October 31, 2003 the Nuclear Management Company, LLC (NMC) submitted a License Amendment Request (LAR) to the Nuclear Regulator Commission (NRC) that would have implemented the industry guidance contained in Nuclear Energy Institute document NEI 97-06, "Steam Generator Program Guidelines". The LAR was modeled after the lead plant submittal for implementation of NEI 97-06. Subsequent to our October 31, 2003 submittal, issues have been identified which are delaying NRC approval of the lead plant submittal and the resolution of these issues may necessitate a revision to that submittal.

Since it is the intent of the NMC to implement NEI 97-06 consistent with the lead plant submittal and since that submittal may be revised, NMC is withdrawing our October 31, 2003 request. It is the intent of the NMC to resubmit this LAR after the NRC has approved the lead plant submittal.

In this letter we have made no new Nuclear Regulatory Commission commitments.

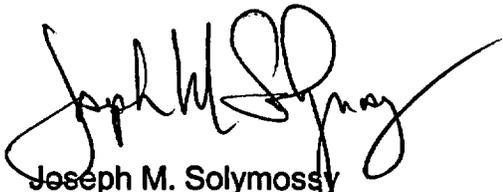

The NMC is notifying the State of Minnesota of this withdrawal by transmitting a copy of this letter to the designated State Official.
