Subject: California Licensees by NRC Type

Paul,

As we discussed yesterday, we are sending a breakdown of the number of California licensees by NRC license type (MS Excel file attached). This is provided, with regard to our request for assistance in estimating the difference in costs to licensees under California's fee schedule vs. NRC's Part 171 fee schedule to assist California in justifying a fee increase. There is not a one-to-one correspondence of CA licenses to NRC license types in a few cases, but this will still be reasonably representative of the distribution of our licensees.

Also, I have a question regarding the exemptions for non-profit educational institutions and small business entities, which we discussed during our phone conversation yesterday. Dennis Sollenberger had estimated that the exemptions amounted to approximately \$2 million in fees that had to be recovered elsewhere, but in looking at the Federal Register publication (April 3, 2003, 68 FR 16374, pg. 16378) regarding the revision of NRC fee schedules, it is reported that the fee exemption for nonprofit educational institutions was projected to amount to \$6.7 million in costs in 2003, and for small entities to \$4.5 million, for a total of \$11.2 million that would have to be recovered elsewhere. If you could assist in verifying the exemption amount that would have to be recovered elsewhere, that would be helpful also.

Thank you for all your assistance.
