The attachment to this memorandum is a transcript of the DOE/NRC meeting that was held on May 30, 1985 to discuss planned interactions between DOE and NRC through roughly the end of this calendar year. Due to the number of typographical errors that were apparent from a quick glance through the transcript, and the need to insure that the material discussed was accurately reported, I decided to carefully review the entire transcript before distributing it. I have finished the review now, and am satisfied that the transcript is an acceptable record of the meeting. I apologize for taking so long to complete my review. I also apologize to Jerry Szymanski who's name is misspelled every time that it appears.

If you have any questions on the material covered, or on the transcript, please give either me or Charles Head a call.
