

**Look me in the eye
and tell me Davis-Besse is safe**

Andrea Manes

December 1, 2003

Jim Caldwell, Regional Administrator
US Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell,

I am writing to you to express my concern about opening the Davis-Besse Power Plant. I am a wife and mother - my daughter Sarah is [redacted] years old, and I want a safe healthy future for her. I live in [redacted] - [redacted] Perry Nuclear Power Facility. So far, we have been lucky with the Perry Plant. The Davis Besse Plant seems as if it was doomed from the start. Thank God the problems were discovered early enough to avoid drastic health dangers due to an accidental meltdown... twice - 1985 and 2002. Perry already has an environmental effect on Lake Erie - adding Davis-Besse could tip the scales against environmental health. I am not an activist, I am not a primitive against technology or alternative energy. I am a human with a family and a concern for the welfare and future of the environment for my child and her future children. Please make sure your top priority in re-opening is SAFETY - not money, big business, or bureaucracy. CAN YOU GUARANTEE OUR SAFETY? IF SO, open it - if not - reconsider.

Thank you.

Andrea Manes

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Caldwell,

Living in [REDACTED] and having
some of my family living in [REDACTED]
[REDACTED]. I am very concerned
of what could happen to them if the plant
in Perry would have a problem. Why?
do we have to use such dangerous material
as nuclear power, get back to the basics
gas & coal. There are thousands of lives
in danger every day and it could all
be changed. If it is true that employees
and contractors have been subjected to
some kind of harassment for raising concern,
for nuclear safety & quality, or compliance
concerns this should be looked into.

I'm sure none of us want to die before
our time or live the rest of our days
with problems caused by nuclear radiation.

Thank you

Anna M. Musackis
[REDACTED] [REDACTED] [REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

DEAR MR CALDWELL,

My name is Scott Bock and I live in a [REDACTED], called [REDACTED]. I raise a young boy, my soon to be [REDACTED] year old son Rider, in my home. As I'm sure you are aware our power is supplied by First Energy Corp. and equally as obvious our drinking water source is [REDACTED] ^{ALONG} ^{THE} [REDACTED]. Recently it has been brought to my attention that there have been several dangerous problems discovered at the Davis-Besse Nuclear Power Plant. While First Energy Corp has worked to correct several hardware problems, as you were quoted on Oct. 2, 2003 in the [REDACTED] saying that, "The technical problems you can fix. But it goes back to fundamentals. I'm not sure that folks at Davis-Besse could actually identify a safety issue." With that being said I believe that the Davis-Besse Nuclear Power Plant must be shut down permanently. As the Regional Administrator of the NRC, I believe that your warning should not be taken lightly as the NRC's primary priority is the safety of the US public. Please for the sake of all of our families, keep the Davis-Besse plant off-line and do everything within your means to insure the plant remains off-line. Any contamination of our freshwater drinking source is unacceptable and the Davis-Besse power plant is a significant threat both mechanically and by its personnel. I would like to hear back from you as soon possible. I hope you feel as strongly about this as I do. Thank you for your time and consideration.

Scott Bock
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

12-1-03

Mr. Caldwell,

Please keep Davis-Besse closed. The bottom line in these issues is always profits not safety. We need a government that encourages alternative energy sources that are renewable and safe for our citizens. The NRC has done a poor job ensuring that people come first - not corporations. Need I say more?

With great concern,
Terese I Krzyz

Mr & Mrs. Bosan

19 Nov 2003

Mr. Jim Caldwell,
Regional Administrator
U.S. Nuclear Regulatory
Commission
801 Warrensville Road
Hisle, Illinois 60532-4351

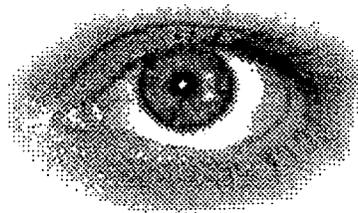

Dear Mr. Caldwell,

As a resident of [REDACTED] and a frequent visitor to [REDACTED], my family and I would be concerned for our health and safety near a defective nuclear plant. Until First Energy can prove it has effectively implemented changes in the corporate culture at the Davis-Besse Nuclear Plant to value public safety over its profitability, I feel it should not be permitted to resume operations.

Thank you for your time and consideration of this matter.

Very truly yours,
Michele & Crozier Bosan

Kristin Wenneman
[REDACTED]
[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

We live at [REDACTED]
in [REDACTED]. It is very
important that Davis-Besse be
sold to a company that is capable
of safely operating the facility. I
have a new baby at home & it
is important to me to know that
she is growing up in a healthy
safe environment. So when making your
decision please consider all of the
children who deserve a healthy environ-
ment to grow up in.

Thank you

**Look me in the eye
and tell me Davis-Besse is safe**

Jim Caldwell,

The fact that you and your agency have thus far allowed FirstEnergy's negligence to go unpunished is astounding. Your mission is to protect my family's health and safety, not to see that the Davis-Besse power plant goes back on-line. Profit and production have been their primary focus, by their own admission. That in itself should be compelling enough for you to revoke the operating license. I implore you to do so, for the sake of all of us in the midwest. Please respond soon.

Thank you,
[Handwritten signature]

[Redacted signature block]

**Look me in the eye

Cheri Rossi
[REDACTED]

James Caldwell
U. S. Nuclear Regulatory Comm.

Dear Mr. Caldwell,

Would you want your family members working at an unsafe environment? Just because the technicians / problems were fixed doesn't mean the safety issues were corrected. Please close Davis Besse for good.

Thank You
Cheri Rossi,

**Look me in the eye
and tell me Davis-Besse is safe**

Dear James Caldwell,

It has come to my attention that the Davis-Besse plant has terrible safety issues as well as quality issues. Given the close proximity of this plant to my home and our water supply, this is of great concern to me and my family.

I ask you to keep First Energy from flipping the switch at Davis-Besse ASAP before the NRC makes its decision.

Thank you for your time,

Dawn Antosh

[REDACTED]
[REDACTED]

Look me in the eye

11/14/03

Mr. Caldwell,

Please keep Davis-Besse closed.
The safety concerns directly
relate to us, living in the
[REDACTED] area. Safety
first, for our family's.

Thank you,
[Signature]

Amy A. Merck
[REDACTED]
[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr Caldwell-

I am a resident of [REDACTED]
in [REDACTED] and I am writing to
voice my concern over the Davis-Besse
power plant re-opening. There were
many problems while the plant
was open in the past. Nuclear
Regulatory Commission is supposed
to help protect the public, not help
promote First Energy's financial
goals. Please keep the power
plant closed and protect the
families of Northeast Ohio.

Thank you for your
attention and I would appreciate
a response.

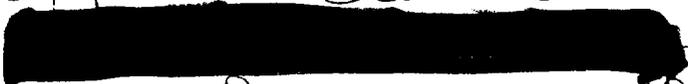

Vanessa Miller

NOV. 12, 2003

Dear Mr. Caldwell,

At a time when we are seeing
~~terror~~ "Terrorist Alerts" for our country.
Maybe we should be more concerned
of potential terror in our country
re: Nuclear Power Plants that
could harm us more than any
terrorist. Please keep this
power plant closed - we live along
the , and after
reading what could happen - it
would be devastating! Please keep
our public safe with the right
decisions!

Thank you!
Sincerely,
Cathy & Ted
Carillo

Wendi Leppelmeier

Look me in the eye
and tell me Davis-Besse is safe

11-19-03

Dear Mr. Caldwell,

My name is Wendi Leppelmeier

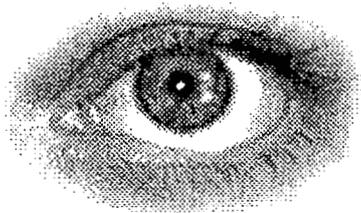

I reside in [redacted]

I understand from news reports that there have been some serious problems at the Davis-Besse nuclear power plant. Being just a [redacted] away from the Perry nuclear power plant I would like to express my concern about the instability of both of these plants.

As a parent of two sons and hopefully grandchildren one day, my concern is their future safety.

Please consider other solutions to these plants - shutting down the nuclear reactors & possibly converting them to coal or gas. I also [redacted] to the Eastlake power source & feel much safer with the conditions there.

Public safety is your ^{my} #1 concern, not the almighty \$. Please keep the Davis-Besse plant closed until proper & safe conditions are met. Thank you for your time.

**Look me in the eye
and tell me Davis-Besse is safe**

My name is Pat Adipietro

[REDACTED]

[REDACTED]

Dear Mr Caldwell

*Due to the problems at Davis-Besse
I feel it should be kept shut down.*

**Look me in the eye
and tell me Davis-Besse is safe**

11/22/03

Dear Mr. Caldwell,

As a longtime resident of [REDACTED] I am concerned for the safety of my family and myself. I am worried that an accident at Davis Besse would contaminate the water of Lake Erie and thus the rivers and lakes that are fed by it. It would also possibly contaminate soil & air.

Please remember that public safety should be your first priority and not First Energy's profits. Keep the Davis Besse reactor closed until the public can be reassured that it is safe to reopen.

Thank you for your time and understanding in response to this matter. I can be reached at the following

20 November 2003

Jim Caldwell
Regional Administrator, US Nuclear Regulatory Commission
201 Warronsville Rd
Knox, TN 37632-4351

Dear Mr. Caldwell,

I am writing to join my voice to others in [redacted] to keep the Davis-Besse nuclear power plant off line permanently.

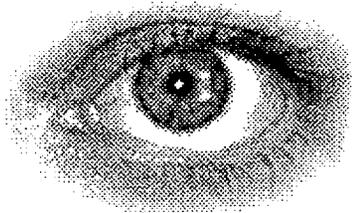

I live in [redacted] - practically in the [redacted] The Perry Nuclear power plant. I am also a breast cancer survivor. Cancers in this area are epidemic and I'm convinced that the power plant has a significant role to play. Today, my sister underwent a mastectomy. She lives closeby, as well. And there is absolutely no history of any kind of cancer in our family.

This is just one of the reasons for keeping Davis-Besse closed. I'm sure the cancer rates there are just as high. Further, First Energy's gross negligence, allowing borax acid to leak through pipes which were not maintained, creating a 6"x7" hole, can only lead to one conclusion. First Energy cannot be trusted to operate a nuclear power plant. And these plants are simply too dangerous, not to mention costly. A meltdown would be horrific - and that almost happened. The NRC's top priority must be public safety and not First Energy's schedule and profits.

Please keep Davis-Besse closed.

I look forward to the courtesy of a response.

Sincerely,
Carol G...

[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Mr. Caldwell,

11/20/03

This evening I was paid a visit by a representative from the Ohio Citizen Action Group who informed me of the troubles the Davis-Besse Power Plant is having. I am a resident of [REDACTED] and am truly concerned for my family and my safety. Based on what I have read, the power plant has had a poor safety record for many years now. I understand jobs and city income is at stake because of the potential closure of this plant, but would ask you to consider further closure. ~~It is not an option.~~ If indefinite closure of this plant is not an option, I would at least hope the plant is gone through with a fine tooth comb. There are many lives and resources at stake if a nuclear melt down would occur. On top of all the troubles, sits the recent black-out which I understand was also ~~traced~~ traced back to this plant. Please reply immediately with your plan on how to handle these issues.

I trust you will make the proper decision with all these points in mind. Thank You!

Scott Szewcyk

INSTEAD OF JUST HAVING CONSUMERS BAIL THEM OUT AGAIN!

Tony + PEGGY MAIMONE

**Look me in the eye
and tell me Davis-Besse is safe**

Jim Caldwell, Regional Administrator

I am sending this to you as you have the authority to keep Davis-Besse closed

With all the problems at Davis-Besse, I think First Energy should look at the alternatives:

- Close the plant permanently
- Sell Davis -Besse to a company that knows how to operate it safely.
- Examine converting Davis -Besse to gas or coal.
- Build a new plant.

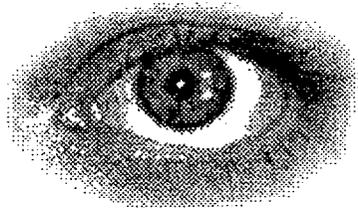

So far, however, First Energy will only consider the most dangerous : flipping the switch

I live about with in [REDACTED] of the Davis-Besse plant and I feel it is a danger to my neighbors and family. I have never felt safe with the plant and it seems as if my worries may bases. We have a very nice community and have lived here for 40 years raising our family and wish to stay. I don't feel safe here at this point If the switch is turned back on, and hope you will check into the problems we have about this.

I would like to remind you that the NRC's top priority must be public safety, not First Energy's schedule

Please keep the Davis-Besse nuclear reactor closed.

Lori Faust
[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

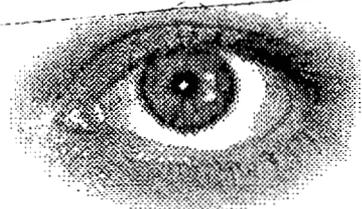

Dear Mr. Caldwell,

my husband, John, and I live in [REDACTED]
and ~~am~~^{are} concerned about the reopening of the
Davis-Besse plant by First Energy. We do
not ~~wish~~ want this plant to reopen ~~if~~ unless
all safety regulations are properly executed.
As Regional Administrator for the U.S. Nuclear
Regulatory Commission, it is your duty to
ensure public safety no matter what the
cost. Please do not reopen the Davis-Besse
plant unless it is 100% safe for the
environment and community.

Sincerely,
Jennifer A. Rodio

Please Reply to:

Nov. 13, 2003

James Caldwell
U.S. Nuclear Regulatory Commission
801 Waverhill Pk.
Lisle, IL 60532

Dear Mr. Caldwell,

I am concerned about environmental safety.
Please do not let First Energy operate Davis-
Besse nuclear plant unless they can assure/guarantee
100% safety now and in the future.

Thanks you,
Sophia Demelas

**Look me in the eye
and tell me Davis-Besse is safe**

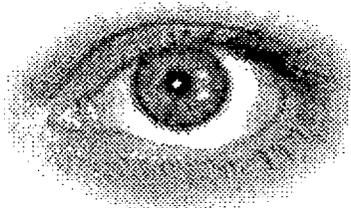

Dear Mr. Coldwell

My name is Katarina Granic.
I live in [REDACTED]. I think
that it would be best if
you closed Davis-Besse. I
have lived here for about 5 years
and I plan on staying here.
I don't want any major problems
to happen because of this. Let me
know what your decision is.

Thank you

Katarina Granic

My address is [REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mrs. Caldwell,

Nov. 14, 2003

I'm writing to you because of my concern for the safety of my family. I believe that safety will be jeopardized by the Davis-Besse plant back on line in its present condition. There are issues that need to be addressed before any decision can be responsibly made. I hope you consider the consequences the wrong decision can have.

I would appreciate an immediate response.

Thank you
Karen M. Kozal

11/26/03

Dear Jim Calwell,

The Davis-Besse nuclear
plant is a concern to me. We
are concerned about public safety &
hope the reactor will remain closed.

Colara Kratcha

[REDACTED]

11-19-2003

Dear Mr. Caldwell,

If Germany can
phase out their
nuclear
power plants we should
be able to also - using
better cleaning equip-
ment or what we have.

The air is too polluted
from uncontrolled
factories, etc. We should
use other methods
& close Davis Bessie
now, we come to close
to an accident. Thank you,

Mrs. & Mrs. Dor Thael

P.S.
We should copy
Germany's ideas
for electricity.

To whom this may concern,

I live in the city of [REDACTED] And that's A very good place to live. IF letting Davis-Besse flick the switch to put [REDACTED] in danger then I would like to let you know that my family is against that.

IF you have all the facts and you still need to be told not to do something then you should not be in charge of the decision making. I feel like your cot to ruin the economy and make it harder ~~for~~ for the American family to live. IF you don't care about the children and elderly people in the city then you don't care about yourself to much.

Mr Caldwell please do what
is right. Remember the
American public has suffered
enough from the September
11th situation, don't make
them suffer over a wrong
decision.

Thank for listening

Please respond
before you make
your decision.

Kim Shoby

①

Dear Mr. Caldwell,

11-15-03

I'm sure you're aware of the public's fear and concern over the whole (no pun intended) Davis Besse issue. I, a [REDACTED] resident all my life, am also very concerned.

My wish is that all of you suit + tie workers would stop thinking about the politics and money, and focus more on the safety of the citizens and the real dangers associated with Davis Besse. I don't live so close to this nuclear killer, (about [REDACTED]) but I do live close enough that depending on how the wind is blowing over Lake Erie, my family and I would be affected. How close do your loved ones live Mr. Caldwell?

Ultimately, regardless of what you decide, we the citizens will be the ones to

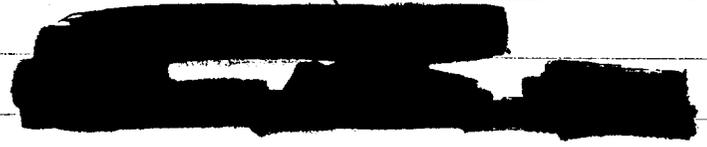

②

pay for Davis Besse. Either through the overcharges to help First Energy regain the money wasted to "fix" it or through the horrific and catastrophic results of another "close call."

Mr. Caldwell, I'm sure you're a very smart and intelligent person. That's why I challenge you and your team to forget all of the politics and focus on a solution that we all can "live" with.

Thank You!!

Mrs. Angela Sanchez
Mrs. Angela Sanchez

Apr. 13, 2003

James Caldwell
U.S. Nuclear Regulatory Commission

Dear Mr. Caldwell,

I do not think Davis-Besse should
ever be allowed to operate again. The
history of carelessness and dishonesty
are such, that I do not believe the
operators can be trusted to even
run the power plant again.

John M. Wallace

Look me in the eye
and tell me Davis-Besse is safe

11/18/03

Mr. Caldwell,

I am concerned over safety issues at the Davis-Besse plant, I hope that you and your commission have the wisdom and backbone to ensure our safety and that you will not capitulate to big business.

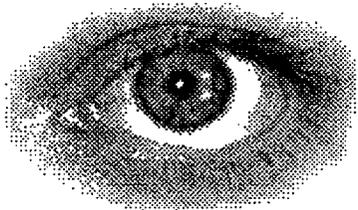

I read in my homeowner's policy that my home is not insured against a nuclear accident. Many of us would lose everything we have.

Please be careful in your decisions because people will ultimately hold you and your commission responsible.

I would be very interested in where you stand in relation to keeping the Davis-Besse closed and why.

William Miller

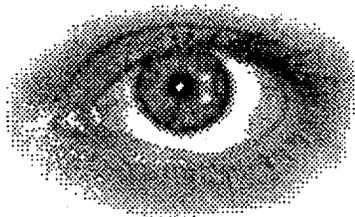

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Caldwell,

You have the authority to keep
Davis-Besse closed, Please do so.
My family & I live in [REDACTED] + If
there are problems w/ the plant we
would like you to take our safety
in consideration, first. The Energy
company can wait on re-opening
until it's safe for everyone.
Please again keep the reactor
closed. Thank You.

T. Styer

Jim Caldwell
Nuclear Regulatory Commission

Dear Sir,

Our family has just ^{moved} to [REDACTED]. We
are very concerned about the ~~is~~ possibility
of ~~the~~ an accident at Davis-Besse plant.
We have just relocated from the [REDACTED]
[REDACTED], a nation where no safety measures
are taken; looking for a safe place to
bring up our five year old daughter.

Please keep the Davis-Besse nuclear
reactor closed.

Sincerely yours,
Sylvia Garvin

[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

11-18-03

Jim Caldwell,

We reside in [REDACTED] and have
concerns that the Davis-Besse nuclear
power plant is hazardous and dangerous
to those that reside within its vicinity.

People, not Short Energy, should be
your first priority.

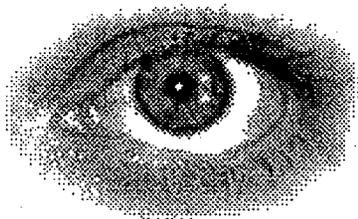

We are asking you to keep this reactor
closed for the safety of the citizens.

I am requesting an immediate response.

A very concerned citizen,

Shelia Kayser

[REDACTED]
[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

We need long term SAFE solutions to our pollution and energy needs. Renewables like solar and wind power offer this.

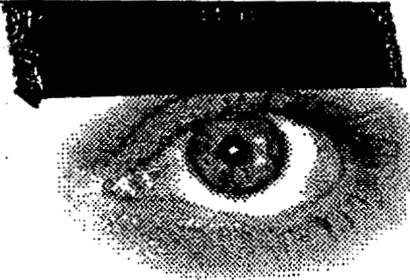

Please make a commitment for the sake of our children's future to gradually abandon nuclear, coal, and fossil fuel generated power and invest your resources in renewables.

Now is the time to start by closing Davis-Besse

To whom it may concern

I write this letter with deepest and upmost thought why would you open reopen this plant when we have perry just plain stupid its all about money power greed if I were you sir I would never think about this power plant but now with all of these problems with the reactor did you're making a wrong decision to do this please spend money on important things in life master james caldwell don't do this this will be the biggest mistake you've ever did having two nuclear power plants I'm sorry sir ~~I am~~ I'm not for it please make the right choice one word is safety think about the people.. please send me a response to my letter

November 13, 2003

Dear Mr. Caldwell,

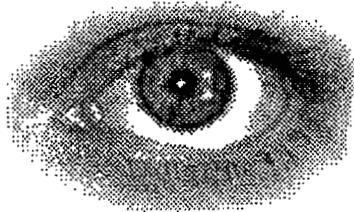

I, too, am interested in the problems at Davis-Besse. It is important that it operates safely and effectively. It is wrong to punish workers who feel that safety is an issue in that working environment. Executives of First Energy need to take full responsibility for Davis-Besse and until they do, the plant should not be permitted to run.

Thanks for your time.

Sincerely yours,

Christine A. Marhevka

**Look me in the eye

Jin Caldwell, Regional Administrator
U.S. Nuclear Regulator Commission
901 Warrenville Road
Lisle, IL 60543-4351

Dear Sir,

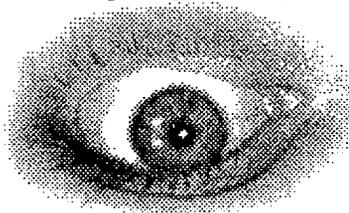

I live within [redacted] miles of Lake Erie shoreline and am concerned about the safety of the Davis-Besse nuclear plant. Not only because of its safety record but also because of the resulting waste that is produced. There is no safe place to store this waste and its life numbers in thousands of years. I believe it is irresponsible for any one to be aware of these facts and not be concerned about the public safety. Please either convert Davis-Besse to a gas or coal or build a new plant, building a new plant that burns gas or coal would be the best solution.

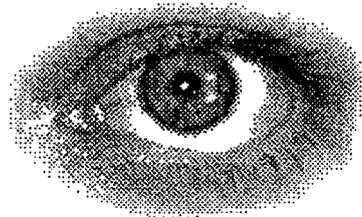

Thank you,

Ann Del Rosa

Joliet, IL 60532-4351

Mr. Caldwell,

As a [redacted] resident of [redacted] [redacted]
I am most concerned with the "unsafe"
operation of the Davis-Besse nuclear
power plant. I fear for the safety &
health of my children & grandchildren.
It is unconscionable to operate this
facility with its documented deficiencies.
Please don't allow its operation until
it's too late for all of us. The greed
of First Energy cannot overshadow

**Look me in the eye
and tell me Davis-Besse is safe**

Jim Caldwell, Regional Administrator

I am sending this to you as you have the authority to keep Davis-Besse closed

With all the problems at Davis-Besse, I think First Energy should look at the alternatives:

- Close the plant permanently
- Sell Davis -Besse to a company that knows how to operate it safely.
- Examine converting Davis -Besse to gas or coal.
- Build a new plant.

So far, however, First Energy will only consider the most dangerous : flipping the switch

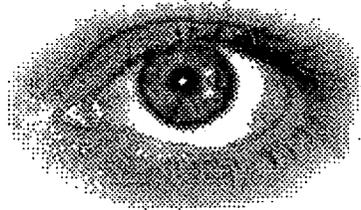

I live about with in [redacted] miles of the Davis-Besse plant and I feel it is a danger to my neighbors and family. I have never felt safe with the plant and it seems as if my worries may bases. We have a very nice community and have lived hear for [redacted] years raising out family and wish to stay. I don't feel safe here at this point If the switch is turned back on, and hope you will check into the problems we have about this.

I would like to remind you that the NRC's top priority must be public safety, not First Energy's schedule

Please keep the Davis-Besse nuclear reactor closed.

Diane Faust
[redacted]

**Look me in the eye
and tell me Davis-Besse is safe**

James Caldwell

With the raising of kids, taxes going up, all utilities going up, makes it hard for citizens to efficiently live. The fact of overcharging consumers annoys me. The safety of my kids are a concern, and I have no problem paying a little extra, if I knew the money was being used to make the power plants safer. If the cost is so high to keep them running, and at the same time, repairs can not be made, it is time to close down. Public safety should always be on your minds, for present & future.

Ron L. Brown

Look me in the eye
and tell me Davis-Besse is safe

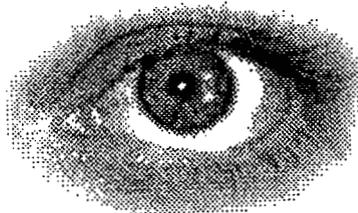

To James Caldwell

Please be sure Davis Besse plant
is safe, we really don't need another
disaster in our world because of ~~greedy~~
greedy big business company's, not caring
about safety. Please do your job James
Caldwell

Dear James Caldwell

I am writing to ask you to refund
past overcharges to customers; also to ask
you to reject FirstEnergy's \$3 billion demand.

I live [redacted] minutes away from the [redacted]
Plant. If I knew that the Regulatory Commission
had found a hole in the reactor lid
and that the cooling pumps never worked
correctly I would probably organize
demonstrations to see that the place
was shut down and that management
was fired.

It does not help to know that workers
who care about their jobs and the
safety of nearby residents cannot speak
publicly about quality and compliance
with regulations without being
retaliated against. This makes you
wonder what is really going on
at that plant.

Sincerely
[redacted]

**Look me in the eye

**Look me in the eye
and tell me Davis-Besse is safe**

To Whom it may concern, James E. Dyer

I am writing in regards to the problem at Davis-Besse. This nuclear reactor should be kept closed. Public concerns regarding safety are more important than First Energy's investment. First Energy makes enough profit on consumers and this power plant would make much of a difference.

The advantages of keeping it closed for the public far outweigh any advantages First Energy could have. Keeping it closed could avert many problems to the citizens of Ohio. Think of Ohio's citizens ahead of big business.

Laura Stevens

ALO31910697 ✓

Mr. James Dyer,

Please keep Davis-Besse closed!

Is it worth our God given land which would ruin it so that we couldn't grow food in the ground and run poison the air that we breathe? The water the most precious thing we have, would affect us all. Is this worth all the death from all kinds of diseases for years to come? Please keep the Davis-Besse nuclear reactor closed. I have lived here all my life & we built our own home with our own two hands. My husband was a [REDACTED] on Logan and he defended our county and land it! So please keep our land safe!

Sincerely,

Dick Honaker

Lisle, IL 60532-4351

Mr. Dyer,

I live in the city of [REDACTED] - a small city [REDACTED] that is only about [REDACTED] miles from the Davis-Besse nuclear reactor. On a clear day, I can see the reactor from the beach. With the reactor being this close to me and my family, I am concerned that the plant is rushing to reopen on a time-table rather than when it is safe.

I writing to simply ask that the Davis-Besse nuclear reactor remain closed at this time. Public safety is essential, and Davis-Besse has twice had near disasters - a third time could be the uncharmed disaster we all hope and pray never happens here.

Thank you for your time sir.

Sincerely,

Lynn R. Behner

James E. Dyer, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warnersville Road
Lisle, IL 60532-4351

Dear Commissioner Dyer,

As a long-time resident of [redacted] ([redacted] years) I am greatly concerned about the prospects of any move by FirstEnergy to reopen the Davis-Besse nuclear power plant. The near disasters in 1985 and again in March, 2002 do not invite confidence in either the design or the administration of that facility. It should remain CLOSED. Whatever advantages or benefits to be derived from getting it up and running again is far outweighed by the catastrophic risks involved to the health, the economy and the environment of this region. In March 2002 we came precariously close to a major meltdown. Let us not run that risk again! I am very hopeful that you will exercise your authority to protect those of us (some 12 million strong) who live in the Lake Erie watershed -- and who would be irretrievably damaged for years to come by the operation and potential addition of breakdown of this troubled facility. Thank you for your expert attention in this matter.

sincerely, Daniel

Daniel J. Goulding, Professor Emeritus [redacted]

Look me in the eye
and tell me Davis-Besse is safe

July 31, 2003

To: James E Dyer,

Dear Sir, I live in the city of [REDACTED] & have been a city of [REDACTED] resident until I moved here last year. I have long feared the threat of a nuclear power plant accident.

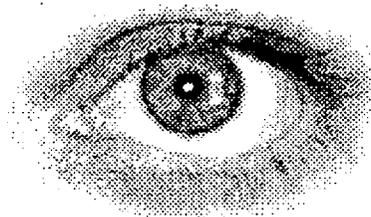

When Davis-Besse was closed last year, it confirmed my worst fear: Corporate America placing dollars before human lives.

Nuclear power is not the answer. Money needs to be spent on alternative power sources instead of "patching up" Davis-Besse & trying to convince consumers that it is safe.

We were 3/8 an inch away from Chernobyl. So that what it's going to take? Another 9-11 disaster to get the public's attention that alternative power sources must be sought, instead of letting First Energy bully their way to putting Davis-Besse back on line.

Well, my family & I certainly don't want to be ground zero for the next wake up call. Please, do not grant First Energy the OK to put Davis-Besse online!

Sincerely, Mr & Mrs Timothy Armstrong

July 7, 2003

James E. Dyer, Regional Administrator
U.S. NRC
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Dyer,

As you are well aware, last year the Davis-Besse reactor, near Toledo, missed bringing Chernobyl to the Great Lakes by a mere fraction of an inch of deteriorating metal. Boric acid ate through six inches of solid steel and left only a warped shard between the superheated core and unfathomable catastrophe.

Now Davis-Besse's owner, First Energy of Akron, wants to reopen the machine that nearly destroyed, in one fell swoop, a region with millions of people along with Earth's largest bodies of fresh water. Indefensible against terrorist attack, Davis-Besse provides potential killing power beyond Saddam's wildest dreams.

But public outcry in [REDACTED] is also reaching critical mass. We join with [REDACTED] in telling you (the Nuclear Regulatory Commission) keep this reactor shut!

Indeed, as it races to critical mass, First Energy faces charges of criminal negligence. Critics say it used "questionable means" to strong arm your commission, that after your inspectors noted disturbing problems in numerous reactors of similar design, First Energy held your inspectors at bay for at least 75 days.

When they finally came to Davis-Besse, your inspectors were horrified to find---by accident---that boric acid had eaten through the entire six-inch solid steel reactor pressure vessel that contains the super-hot radioactive core that powers the plant. The decay had been in progress for at least six years. Only an unrelated thin shield---already warped from intense heat, pressure and radiation---prevented an incalculable radiation release. Thousands of people and millions of acres of land and water hung by a shred.

Davis-Besse is a clone of the reactor at Three Mile Island, which melted to global horror in 1979. It's long been plagued by bad design, multiple mishaps, low worker morale and slipshod procedures. Thousands of northern Ohioans repeatedly packed rallies and hearings demanding that the reactor stay shut. Ohio Citizen Action and national organizations such as the Union of Concerned Scientists (UCS) and the Nuclear Information & Resource Service (NIRS) challenged the NRC to face up to First Energy's blatant disregard of standard safety and maintenance procedures.

10703 ✓

JUL 10 2003

But First Energy barreled ahead with a quick fix. Spending as much as \$400 million, they carted in a vessel head from a Midland, Michigan reactor shut by citizen opposition in the 1980s.

Serious problems remain. Decay has been found on the bottom of a Texas reactor, calling into question whether similar problems could still materialize at Davis-Besse. And UCS has raised the specter of criminal charges against First Energy for its apparent violations---and coverup---of a wide range of violations of NRC regulations. UCS's David Lochbaum says the notoriously slipshod safety culture at Davis-Besse remains at issue.

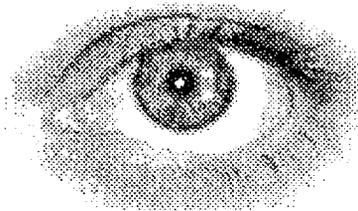

And new studies now indicate that wind energy in the northern Ohio area could replace Davis-Besse. It's long been assumed that the breezes along Lake Erie, while substantial, were not powerful enough for serious commercial turbine development. But recent advances in windmill design have made the harnessing of "marginal" wind potential like that in northern Ohio economically feasible. And the winds there now seem far more powerful than previously believed, especially offshore from Cleveland.

Were Davis-Besse to stay shut, the ample transmission lines left vacant could carry a flood of wind-driven electricity. The state's first two utility-scale machines will be installed in September by the city of Bowling Green. With wind replacing Davis-Besse's power, billions in development revenue and thousands of jobs could result.

In light of these considerations, we demand a full vetting of potential criminal charges and proof that the plant can be operated safely before Davis-Besse re-opens.

Respectfully,

Jim Wagner
Virginia Wagner

Mr. Dyer,

I have been given the opportunity to express my concern with the safety of Davis-Besse... As a citizen, I would like to think that public safety is top on the list of "Business America," but know too well [REDACTED] it is NOT! My father died of a rare [REDACTED] my father-in-law died of lung disease from [REDACTED] Now a distant family member is dying of asbestos related stomach cancer from the steel mills. All three men would be alive if the safety of people had come before the profit and surplus supply of "entitled" commodities. What if the hole had burst in the Davis Besse reactor — would I be next? We are told that nuclear energy is a solution to an energy crisis, but in reality isn't the plant just a HUGE disaster in waiting? First Energy may assure the public that safety precautions are in place, but there will ALWAYS be human error. If our safety was a valued commodity than I would not have to write a letter because the plant would not have been placed in ^{such} a precious site. A moral code of ethics to preserve life with the minimum standard of little to

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. James E. Dyer;

When the Ohio Citizen Action came to my door urging me to write this letter, it was not the first time I heard of the Davis-Besse problem. To me, a plant such as this is too dangerous to operate in our community. I live in [REDACTED], [REDACTED] from the shores of Lake Erie. With two near misses in twenty years, I am not prepared to risk the safety of thousands of people on a chance that this disaster may happen again. Lake Erie helps sustain millions of people. With only $\frac{1}{4}$ of the earth's water being potable, we should not put such a valuable resource in harms way because of an unsafe plant like Davis-Besse.

The money we put into Davis-Besse could better be used to find safer, renewable sources of energy. We should be looking toward a future where these accidents are obsolete instead of floundering to perfect an imperfect plant. Please listen to my voice and the voice of many other Ohioans. We value our safety and know that you do too. Keep Davis-Besse safe - keep it closed.

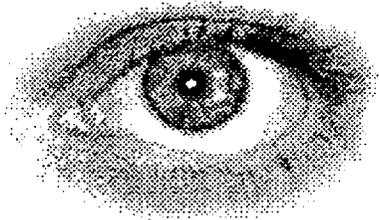

Sincerely,

April Cipo

Dear Sir:

I'm writing this letter to you to inform you of my interest and concern for the safety of my family as well as the natural resource in Ohio, Lake Erie.

It has always troubled me; as a father; and a sportsman; of the grave danger nuclear power plants pose; to health and safety as well as to the environment.

But especially to have a nuclear power plant; (plants) located where potentially an accident could affect our country's greatest natural freshwater resource; is unthinkable.

Sure; safety this, safety that. Need all I say is 9/11. Unthinkable things surely do happen. And so irreversible. So devastating. Yet in this case; I feel preventable.

The risks are too great. Alternative methods and technology are available. Our un-renewable freshwater resources are far too valuable to risk to such possible devastation.

Lisle, IL 60532-4351

Dear Mr. Dyer,

My 4 year old daughter asks, "Why do they put pollution in the water?" I cannot say exactly, but I think it's because the interests of business are ranked higher than the interests of individuals.

We live in [Redacted], about an [Redacted] drive from Davis-Besse. I've been watching this story for the past two years; my husband, 4-year-old son, 2 year old son, and daughter, and I are very concerned that our safety is being compromised. Davis-Besse needs to remain closed; it has remained in use well-past its limitations.

Please let us know that you agree, and that you will put foremost the health and well-being of us all.

Thanks. I'm enclosing some pictures painted by my [Redacted] children illustrating what they →

To: Jim Caldwell
NRC
801 Warrenville Rd.
Lisle, Illinois

Dear Mr. Caldwell:

We are residents of [REDACTED] and are opposed to the reopening of the Davis-Besse plant. We feel that the problems plaguing the plant have not been rectified.

Please consider public safety over First Energy's schedule. We urge you to keep the plant closed. Thank you.

Sincerely,
Joe & Blake Callese

[REDACTED]

Dear, James Caldwell I
would like to see Davis-Besse
Closed until all safety issues
have been met. I think a
good step would be to
organize all of the employees
at the Davis-Besse plant. If
the workers were Union
Davis-Besse would never get
a way with such unsafe
working conditions. First Energy
is already over charging customers.
Why should we pay more for
them when they're not losing
any profits. They should take
money out of their own pockets
to pay for what they're responsible
for.

[redacted]

01-Dec-2003

Dear Mr. Caldwell,

My name is Thomas O'Brien and I reside at [REDACTED]. I am writing to you out of concern for the well being of my family regarding the safety concerns at the David Besse Nuclear Power Plant.

During the recent downturn in the economy many companies have shortcut the areas of "overhead" to cut costs and maximize profits. The energy companies like First Energy have been particularly hurt by the problems at Enron. While the issue of safety is a concern for many companies, it is also an area that gets neglected during difficult economic times. We need to look no further than the recent space shuttle disaster for proof of where safety priorities fall when budgets are concerned.

Mr. Caldwell you can prevent a tragedy such as the space shuttle by pulling the plug on the David Besse Nuclear Power Plant. I implore you to consider alternative means of power, such as industrial gas turbines. Alternative methods of producing power will provide the residents of Ohio with safe, clean electricity.

Sincerely,

Thomas O'Brien
[REDACTED]

James Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Rd
Lisle, IL. 60532-4351

I live in [redacted] about [redacted] miles [redacted] of [redacted] and [redacted] miles [redacted] of [redacted] Electric Plant. As a [redacted] resident of this area, I am keenly aware of the environmental, economic and recreational impact that Lake Erie has on this state. Any and all threats to the health of this lake must not be tolerated.

Everytime that I read about or see on T.V. the problems that First Energy has with Davis-Besse or Perry for that matter I fear for the safety of my family and neighbors. This company seems to not pay attention to details in providing safety or reliability when running any of its plants. Remember this is the electric company that gave us the summer blackout.

Before you let Davis-Besse go back online you must give us proof that First Energy is going to be a good corporate citizen and put the health and safety of all the people before the profits to its shareholders. Remember First Energy let this plant fall into disrepair once how can we trust them now. Any fouling of the lake by this plant will last for centuries so a little patience in making sure this plant is run right is worth the wait.

Thank you

NUCLEAR REACTOR "CLOSED"

FRANKY. SUGIYAMA TO

[REDACTED]

[REDACTED]

[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

To Jim Caldwell (and/or anyone else it may concern)

We live in [REDACTED] and therefore have a healthy fear of what could go wrong living in such proximity to a nuclear power plant. Our whole family swims, fishes and drinks from Lake Erie on a [REDACTED] basis.

The NRC's FIRST PRIORITY must ALWAYS be public safety. If just one person or family was injured by a nuclear accident caused from neglect or careless effort to keep on a schedule then you and the NRC have failed miserably. If you are not 10,000% sure that the Davis-Besse reactor is not in flawless condition then you have a legal and most of all a moral obligation to keep the plant closed. There is no gray area.

I notice your address is all the way in Illinois. Would you be willing to move and live next door to it?

801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Dyer,

I am most concerned with the issues surrounding the Davis -Besse Plant. I live in the City of [Redacted] and am concerned about the recent articles on Davis-Besse. I read where they found a rust hole in the reactor that could have caused a meltdown in the future. I realize that the nuclear plant is important to the surrounding area, but it is not more important then the safety and well being of the population in surrounding areas. The top priority of the NRC has to be the safety of this population first and foremost. As a concerned citizen, I am asking you to keep the Davis-Besse plant closed. I believe that this is the only way this aging structure will not harm innocent people. I would ask that you send me a response to this letter, and hopefully it will be a favorable one.

Sincerely,

John J Sim

Edwin Price
[REDACTED]
[REDACTED]

James E. Dyer, Regional Administrator
U.S. NRC
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Dyer:

I live in the [REDACTED], and therefore I worry a lot about the Davis-Besse nuclear plant. As a large nuclear reactor [REDACTED] of me, it has the potential to spread radiation over large parts of Ohio, including my home, if a disaster occurs. Given this, I hope you would agree that the highest safety standards must be met for this plant to be operating. Unfortunately, this is not the case. Davis-Besse remains the most dangerous nuclear plant in America. In February 2002, it came closer to a nuclear meltdown than any U.S. plant since Three Mile Island. Investigators discovered the cause: years of management neglect for basic maintenance, lying to regulators, ignoring employees warnings, and punishing anyone who spoke out. Fifteen months later, none of the top managers have been replaced, and the company's own investigation shows continued widespread intimidation of workers who discover safety problems.

The top priority of the NRC should be public safety, not the desires of FirstEnergy. I urge you to keep the Davis-Besse nuclear reactor closed. Please let me know how you plan to proceed.

Sincerely,

Edwin Price

MLD31910623 ✓

Dear Mr. Dyer,

Our home [REDACTED]

to the Davis-Besse nuclear plant.

We are concerned not only for the safety of our home but the planet's environment. The NRC's first

concern should be for the public's safety & should do all in its power to keep the reactor closed.

We do not understand why a nation as great as ours has not turned to alternate types of power. The waste

alone from these reactors pose a hazard.

NOV 14 2003
ML031910616 ✓

The government should start to explore & implement the many other ways to supply the public with powers such as wind, solar and new areas where they are turning our building amounts of refuse into fuel.

Sincerely,

Steve & Marilyn Koval

P.S. We would appreciate a response to know that our voice has been heard & not taken lightly.

Dear Mrs. Dyer,

I have lived in the [redacted] area all my life ([redacted] years) and vacationed in the [redacted] area of Ohio in which Davis Besse is located, for most of those years. To think [redacted] in Besse will be reopened [redacted] everyone being convinced [redacted] it is safe is unconscionable.

I read in the Plain Dealer the company announcement when it will open. Why do they decide when it opens? They seem to be running the show - not the NRC. This plant has had a history of problems and they seem to be patched up to company standards. I'll be satisfied it is ready when Dennis Kucinich gives his approval. Make him happy & we will all breathe easier

Dear Mr. Dyer,

As a resident and father of a family in [REDACTED], [REDACTED], I am very concerned about the safe operation of the Davis-Besse Nuclear Power Plant.

I grew up outside of [REDACTED] and recall vividly as a child as I fled [REDACTED] to seek safety from Three Mile Island. I do not want my children to ever have to go through a similar trauma.

I am sure you agree, that safety is the number 1 concern for the residents of the area.

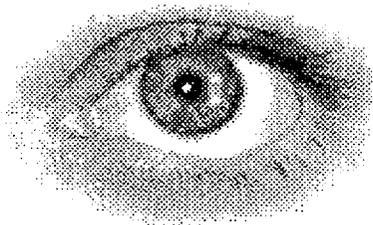

Please keep Davis-Besse closed!

Thank you for your timely response.

Look me in the eye
and tell me Davis-Besse is safe

07-08-03

Dear Mr. James Dyer,

We have been residents of [REDACTED], [REDACTED] for over [REDACTED] years, and we (our family) are quite concerned about the Davis-Besse Nuclear Power plant. Our city gets its water from Lake Erie, and we are about [REDACTED] miles from Davis-Besse. Our family is concerned about the safety issues in regards to putting the plant back in service.

We would hope that you being in the position of Regional Administrator, would keep Davis-Besse shut down until there is absolutely no danger of there ever being a meltdown or leakage problem! We are very concerned that First Energy may try to cut corners and start the reactor up prematurely.

We would appreciate hearing what your assessment & thoughts are in regards to Davis-Besse.

Concerned Citizen!

James E. Dyer, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 606532-4351

Dear Mr. Dyer,

I live in a community [REDACTED] from the Lake Erie Shore and I am sure I need not indicate the vulnerability of the population and the Great Lake system to nuclear disasters at any of the nuclear power plants along the Great Lakes.

I sincerely hope that Davis-Besse continues to be closed until there are assurances of its safe operation.

I strongly urge you to maintain strict scrutiny of the operation of these power plants to assure their safe operation. I do not trust the internal bureaucratic mechanisms (private or public) that would be solely responsible for inspection and safe maintenance. Mechanisms such as redundant inspections, unannounced inspections, and safety for whistle blowers as well as continued update of inspection techniques are critical.

Please respond with information of such mechanisms or others that are being put into place and information about plans the Commission has for Davis-Besse and any other nuclear power plant along the Great Lakes.

Sincerely,

Lloyd Douglas Moore

Lisle, IL 60532-4351

July 8, 2003

Dear Sir:

It is with great consternation that I write this letter. I implore you to consider the dangerous consequences of re-opening the Davis-Besse nuclear reactor. How close did we come to a holocaust disaster in the past from this particular reactor? Way, way too close in my and a lot of others opinions. First Energy's schedule and bottom line "make a buck" corporate greed should not be the determining factor in these grave matters. There has been no change in the inept management practices or personnel that lead to the near disaster in February 2002. Investigators discovered the cause: years of management neglect for basic maintenance, lying to regulators, ignoring employees warnings, and punishing anyone who spoke out. Fifteen months later, none of the top managers have been replaced, and the company's own investigation shows continued widespread intimidation of workers who discover safety problems. This is a very serious problem wouldn't you say?

As a civil servant you must always remember just who it is that you are to serve. It is the people, not the corporate interests that must have priority. I implore you to do the right thing and not let this potential disaster waiting to happen return. The next time we might not be so lucky.

Just what is the rationale for opening this potential disaster? Is corporate bottom line more important than the health and welfare of the people? There are alternative ways to produce energy in sufficient quantities if the political will is there for research and development is there not? Please respond.

I write this letter on behalf of my family and relatives who have lived in the [REDACTED] area all of their lives and on the behalf of all concerned citizens who do not support the opening Davis-Besse Nuclear Plant.

Respectfully,

Dennis Davis

The Underwood's of [REDACTED] [REDACTED] are concerned for our drinking water safety. Please make public safety a priority above the demands of First Energy's production.

We ask that you keep the Davis-Besse nuclear reactor closed. Many thanks for taking the time to read this and we hope you comply with our request!

The Underwood's of
[REDACTED] [REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Mr. Caldwell,

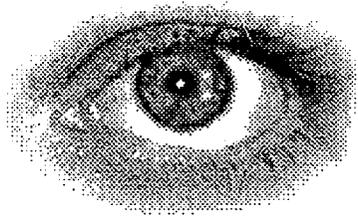

Just a moment of your valuable time.

I've recently become more educated, or aware, of what I see as a possible hazard in regards to the nuclear plant known as Davis-Besse. I have to tell you I am quite concerned.

The incident in March of 2002, in my opinion, should not have ~~not~~ been missed or allowed to get to such a dangerous point.

I believe stricter and increased frequency of inspections are called for. If you insist on running the plant, please do your best to maintain it — properly!!

Thank you,
James C. Lewis

Dear Jim Callaway
U.S. Nuclear Regulatory Comm.

My family and myself
live in [REDACTED] I am
concerned for our safety.

I feel the risks out
weigh the advantages when
the ^{David Besse} Perry Nuclear power plant
is concerned.

Why would our country
consider for one minute taking
the chance of a disaster.

September 11 is still a vivid
memory and a real fear.

David Besse is a perfect
target for terrorists.

Money is not the bottom
line (Just Energy), security
is. I look forward to your
response.

Oct 7, 2003

Attn:

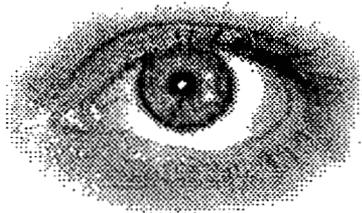

Jim Caldwell

I am married and have [redacted] small children. Justin, [redacted], Justin [redacted] or Tanner [redacted]. We live in [redacted] a very small community near the Davis-Besse facility.

I personally would like to see this facility stay closed. During the summer months I regularly take my family to the beach. The facility is clearly viewable from the beach location. Every time I look @ Davis Besse from abroad, I wonder ~~too~~ what would happen if there was a leak? Water would be effected, fish, tourist activities. I could go on & on.

Please keep it closed? So that myself & others can enjoy our lives, healthy & happy.

Thank you
Mrs Nancy Shan

Mr. Jim Caldwell, Regional Administrator
U. S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

I am typing this rather than handwriting so you can read it more easily.

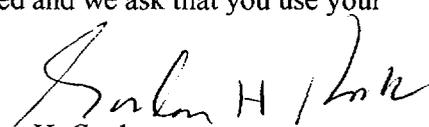

You probably realize, along with me, that American citizens are losing faith in our national, regional and local governments.

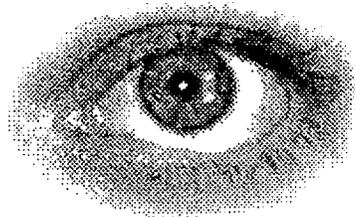

Regulations of Utilities, Railroads and all other services provided to all citizens, have been rescinded, canceled or otherwise rendered ineffective. Those services have become more expensive and more unreliable as the result of self regulation by industry.

The basic reason for all of this de-regulation is simply that corporations have become and assumed equality with natural persons in the eyes of the law. (If you read the history of this farce, you will find it resulted from a clerical error in a court decision).

I believe that most of us citizens have little faith in the self regulation of utilities and that extends especially to nuclear energy producers. In your official position you know much more than I about the effectiveness, or lack of, in the nuclear energy business.

Please consider the human misery that can result from a breakdown in our safety processes at Davis-Besse. We believe it should be permanently closed and we ask that you use your regulatory powers to make that happen.

Gordon H. Cook

Lisle, IL 60532-4351

10-8-03

Dear Mr. Caldwell,

My family and I reside just south of Lake Erie and the Davis-Besse Nuclear Power Plant. Due to the power plant's disastrous history and the NRC's failure to create and maintain a safe environment in and around the plant we feel that the plant should remain closed. NRC's top priority must be public safety and human and environmental welfare, not First Energy and their need for big business.

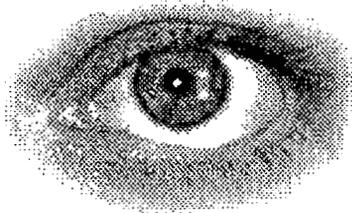

An accident at the plant, whether it is deemed large or small, could cost my family for the rest of our lives. I am not willing to risk the life of my [REDACTED] son, his well-being or welfare. Truly the lives of those living around and in the vicinity of the power plant are worth much more than the risk? I believe so.

The disaster at Chernobyl Nuclear Power Plant should be a lesson the world learned from. If history is forgotten, it is doomed to repeat itself. This would be a very tough lesson to take. Unfortunately it seems that history is on the road to repetition with the reactor at Davis-Besse.

Keep Davis-Besse Nuclear reactor closed.

Sincerely,

Michael B. Dell
