RE: Revised LSN Guidelines

Four LSN Guidelines and one Appendix have been revised, and are being transmitted to you via this letter. A change (addition or deletion) from the prior version of a guideline is identified by a vertical bar in the margin.

Guideline 3, Solution for LSN Implementation, was revised to acknowledge that the solution has been implemented and the system is operational. The LSN server configuration was updated to reflect the new load balancing architecture. Additionally, the Administration section was updated to reflect the standalone system currently in use.

Guideline 5, Searching the LSN, was revised to delete references to a search engine functionality that is not applicable to the LSN.

Guideline 6, Passwords, was revised to reflect the new load balancing architecture and to delete a reference to the search engine functionality mentioned above.

The revised LSN Guideline 15, OCR Accuracy, was distributed to the LSNARP on April 22, 2003. As a result of the revision, Appendix B, OCR Accuracy Requirement Rationale, was deleted.

As a result of the above modifications to the guidelines, the Table of Contents and Appendix A, Acronym List, were revised.

These guidelines in no way affect or supersede or otherwise relieve a participant from compliance with the Commission's Rules of Practice in 10 C.F.R. Part 2. They document the decisions reached by the LSNARP and the implementation of the LSN technical solution. Input from the LSNARP is encouraged and will be documented and added to these guidelines, as appropriate.

Please delete or remove the current Cover and Table of Contents, Guideline 3, Guideline 5, Guideline 6, Appendix A, and Appendix B from your LSN Guidelines and replace them with the attached revisions. The guidelines online on the LSN will be revised accordingly.
