SUBJECT Proposed DOE/NRC Meeting on Generic Exploratory Shaft Design/Construction, Licensing Issues, and the ESTP, July 18, 1985				

SUMMARY John Greeves, Jerry Pearring and Dinesh Gupta attended the pre-arranged tele-conference with the DOE (Maxine Dunkleman could not attend due to other pressing engagements). Topics discussed during the call included possible agenda items, receipt of advance documents, meeting participants, and location of meeting. The following is a summary of key discussions:

- At the proposed meeting, the DOE would like to identify what they consider to be important generic issues on ES design/construction/licensing and in-situ testing.
- The DOE proposed the following topics for discussion at the meeting: (i) Selection ~~Rationale~~ for the Exploratory Shaft (Location and Construction Method), (ii) Subsurface Layout and Space Requirement; testing beyond SCP (iii) Repository Interface with ES, (iv) Safety related effects due to ES construction and (v) Quality Assurance (about 5% of the meeting time).
- NRC suggested addition of the following topics for discussion at the meeting (i) Adequacy of the scope of in-situ testing, (ii) representativeness of testing results and their applicability to the entire repository block, (iii) comparison of the scope of in-situ testing plans for various sites and (iv) coupled effects (thermal, mechanical, hydrological and chemical).
- The DOE stated that the DOE's proposed agenda items will be delivered to NRC on June 28, 1985 for comments. No other advance material will be available before or during the meeting.
- The DOE said that about 15 DOE people would attend the meeting. These would include Stein, Frei, Stucker, Rhoderick, Weston Rep. and about 3 reps. from each project site.
- The meeting will be held at Willste Bldg., Silver Spring, MD.

ACTION REQUIRED
NRC will review DOE's draft agenda and provide comments to Mark Frei, DOE.
