

DOCKET NUMBER  
PROPOSED RULE PR 50  
(69FR 00879)

January 27, 2004

DOCKETED  
USNRC

January 28, 2004 (7:22AM)

To: SECY@nrc.gov

Cc: Wally Norris, Hans Ashar

From: Dennis D. Davis

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Subject: Comment for RIN 3150-AH24 (FR Vol. 69, No. 4, January 7, 2004)

Please consider the following comment and recommendation with the added underlined text noted below.

**Comment:**

§50.55a(f) states in part "Requirements for inservice inspection of ... Class MC ... components (including their supports) are located in §50.55a(g)". However requirements for Class MC supports are not specifically addressed in §50.55a(g).

**Recommendation:**

Revise §50.55a(g)(4) in the second sentence to read "Components (including supports) which are classified as Class MC ... "

**Reference:**

NEI's April 11, 1997 Question No. 15 asked, "Is it the intent that all Class MC supports be examined by the end of the utility's current interval? The NRC responded to the question on May 30, 1997 and stated in part " ... support welds are to be examined in accordance with the requirements of the rule." and further stated in part " ... examine the rest of the supports ... utilizing the applicable provisions of Subsection IWF."

Sincerely,  
Dennis D. Davis, P.E.
