 Savage, MN 55378

Dear Ms. Lehman:

As we discussed at the August 1983 workshop on performance assessment of BWIP at Richland, Washington, I am sending you a copy of the report entitled "Non-Isothermal Flow Modeling of the Hanford Site." This report was authored by Matthew Gordon and myself. It is a status report on the NRC's ongoing effort to assess the performance of potential sites for the disposal of HLW. The report does not necessarily reflect the opinion of the Commission on the suitability of the Hanford Site as a HLW repository.

Matthew and I would be pleased to respond to questions or comments that you may have after you have completed reading the report.

Sincerely,

Original Signed By:

Michael F. Weber
