SUBJECT: RENUMBERING OF SWIFT CYCLES AT BNL

Pursuant to a request from ADPS, I am changing the numbering scheme for permfile cycles for SWIFT on the Brookhaven 7600. Now, whenever I change the current SWIFT version, I will use a new, higher cycle number. (My previous practice has been to replace cycle 2.)

The "unadulterated" SWIFT version without any of my updates will now be cycle 1 permanently.

To access the latest version, use the following control card:

ATTACH,SWIFT,SILLINGSWIFTPTC,ID=ZZRNRC,MR=1.

This looks like the control card NRC users have been using all along, except that now there is no CY=2 parameter.
