SUBJECT: CALLAWAY PLANT, UNIT 1 - REVIEW OF LICENSEE'S COPY OF THE  
FACILITY OPERATING LICENSE (TAC NO. MC0786)

Dear Mr. Randolph:

A comparison review of your copy (i.e., the licensee's copy) of Facility Operating License No. NPF-30 for the Callaway Plant with respect to the License Authority File copy contained at the Nuclear Regulatory Commission has been completed. This review included the following appendices to the license: Appendix A (Technical Specifications), Appendix B (Environmental Protection Plan), and Appendix C (Additional Conditions). The enclosed table shows the differences found between the License Authority File and your copy of the license that need to be corrected. In some cases, an error was found in both the License Authority File and your copy of the license.

The corrections shown in the enclosed table are divided into the following two categories: (1) the error in the licensee's copy of the license can be corrected without an amendment because the licensee's copy is being changed to be the same as the License Authority File, or (2) the error, in both the License Authority File and the licensee's copy of the license, has to be corrected through an amendment to the license. You are requested to correct the Category 1 errors within three months of the receipt of this letter. For the Category 2 errors, because these two errors are not significant, you are requested to propose the correcting amendments within 18 months of the receipt of this letter. The second enclosure is a copy of Appendix C, the additional conditions on the license, from the License Authority File.

Sincerely,

/RA/
