

**UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, DC 20555 - 0001**

January 27, 2004

Mr. Farrokh Shokooh
President and CEO
Operation Technology, Incorporated
17 Goodyear
Irvine, California 92618-1812

**SUBJECT: RESPONSE TO NRC INSPECTION REPORT 99901350/2003-201, AND
JUNE 23 AND OCTOBER 31, 2003, NRC LETTERS**

Dear Mr. Shokooh:

Thank you for your December 9, 2003, letter in response to the Notice of Nonconformance (NON) that was discussed in the subject U.S. Nuclear Regulatory Commission (NRC) Inspection Report and our subsequent letters, dated June 23 and October 31, 2003.

We have reviewed your letters and find that your December 9, 2003, reply is responsive to the NRC concerns regarding the Operation Technology, Incorporated (OTI) electrical transient analyzer program ETAP® PowerStation® (ETAP-PS) software program control. We have no further questions at this time and will review the implementation of your corrective action during a future NRC staff inspection to determine that full compliance has been achieved and will be maintained.

However, if OTI identifies any problems during its review of fuse time-current curves, we request that you contact either Joe Petrosino or Greg Cwalina at (800) 368-5642. If you or your staff has any questions regarding this matter we will be pleased to discuss them with you.

Sincerely,

/RA/

Theodore R. Quay, Chief
Emergency Preparedness and Plant Support Branch
Division of Inspection Program Management
Office of Nuclear Reactor Regulation
