REQUEST FOR URANIUM SLABS FOR ROLLING AT SUPERIOR STEEL CORPORATION DFW-55-400

SYMBOL: OFO;OES

Please refer to your copy of the teletype from P. J. Nagelsten, Savannah River Office, to this office, on October 7, 1955, concerning DuPont's request for an additional 30 uranium slabs made to the requirements given in their July 18, 1955 letter, DFW-55-321.

We concur with this request and would appreciate it if you would arrange for delivery of the requested uranium slabs to Superior Steel. In view of the tight uranium supply situation, we suggest that you review the impact of this development request upon your ability to meet the reactor production delivery schedule. If any conflict exists, we suggest you contact the Savannah River Office to establish priorities. Actual shipping schedules should be arranged with Savannah River.

S. R. Sapirio
