MATERIALS - 9 Research Issuance

Subject: SF MATERIAL ACCOUNTABILITY

Dear Mr. Massey:

Within a week we expect to ship to you about 600 pounds of normal uranium for your research and development work. Accountability will be handled by Station COL at this office. However, in order to keep Station COL informed, so they may prepare transfer forms and accountability reports, the following procedure should be followed:

1. A memorandum should be sent to Mr. J. Maffucci at Station COL, U. S. Atomic Energy Commission, P. O. Box 30, Ansonia Station, New York 23, New York, advising the date material is received.
2. Prior to any shipment, Station COL should also be advised as to the consignor, consignee, date and manner of shipment, lot number, gross, tare, net, and SF net weights.
3. On or before the fifth day of each month, a report should be sent to Station COL giving weights of materials in kilograms.

When reporting the information outlined in 1, 2 and 3 above, it will be appreciated if a copy of such information be made available to Mr. G. E. Dunlap of this office.

We hope that you will call to discuss any questions you may have regarding the procedure outlined above.

Very truly yours,

F. M. Belmore, Director
Production Division
