Purpose Of Telecon

The Nuclear Regulatory Commission Staff called to discuss report on PORSTAT code by Sagar and Clifton (1983)

Text Of Telecon

R. J. Wright asked if the PORSTAT code was or is going to be a major performance assessment code. I indicated that PORSTAT may become a major code. I also mentioned that we are still doing some code development and testing on PORSTAT.

M. Gordon asked if PORSTAT was the code used to generate our probabilistic results (presented at the Performance Assessment workshop) for groundwater travel time. I indicated that those results were generated with the MAGNUM-MC code.

Mr. Gordon is currently reviewing the report by Sagar and Clifton and will provide comments to BWIP at a later time.
