Purpose Of Telecon

Nuclear Regulatory Commission's (NRC's) Request on Block Test Data

Text Of Telecon

This phone call is a followup of an earlier telecon between Bob Wright of NRC and Ralph Gimera of the Basalt Waste Isolation Project (BWIP), Rockwell Hanford Operations.

K. Kim asked Bob Curtiss what types of data or information Acres International needed for their model verification and benchmarking work. Bob Curtiss stated that they needed thermal/mechanical response data of basalt rock mass similar to the data from Stripa tests and tests conducted by Project Salt Vault. Full-Scale Heater Tests #1 and #2 data would satisfy their needs.

Bob Curtiss and/or others of Acres International would like to visit Richland but they need NRC's authorization for funding necessary for the trip. They will seek NRC's authorization and let BWIP know the exact date of their visit. The mutually convenient date of the visit was tentatively set at November 21-22, 1983. Bob Curtiss will notify the BWIP of the final arrangement of their visit.
