Dear Mr. Olson:

TELEPHONE CONFERENCE REPORTS
(Contract DE-AC06-77RL01030)

Attached, please find a copy of our Telephone Conference Report with Mr. R. Coutre, Argonne National Laboratory (a Nuclear Regulatory Commission contractor), on November 28, 1983. Per your instructions, we have also transmitted copies to the individuals identified on the distribution list.

If you have any questions, please contact Mr. J. H. LaRue on 376-8506.

Very truly yours,

EBA
E. B. Ash, Director
Basalt Waste Isolation Project

EBA/jac

Purpose Of Telecon
To discuss backfill temperatures and waste package designs.

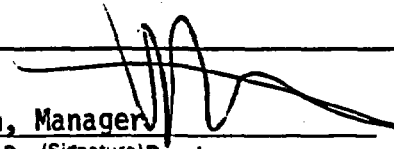

Text Of Telecon
(1) Mr. Coutre wanted to know the backfill peak temperatures for reference design.

Answer: Assuming backfilling occurs 50 yr after emplacement of a commercial high-level waste package, peak backfill temperatures are:

Location	Peak Temperature
o Canister/Backfill Interface	252°C
o Backfill/Host Rock Interface	235°C

(2) Mr. Coutre also wanted to know if we were considering alternate designs.

Answer: Yes. Engineering Studies are in progress to evaluate alternatives. The results of these studies will be used to produce an Advanced Conceptual Design for the waste package which will be completed in fiscal year 1985.

M. J. Smith, Manager  11/28/83
