SUMMARY

On Friday, 11/12/82, I received a call from Betty King, Rockwell Library, regarding the BWIP SCR references. She explained that per DOE's request, she and her staff were copying all the BWIP SCR references for NRC, except the Rockwell reports and the hardback books. She said, when possible, microfiche would be sent instead of paper copies. Her staff is to complete this task by 11/19/82. I informed Dr. Wright of my conversation with her; he said his understanding with DOE is that they will only send those documents which are not readily available which we determine we will need in our analysis.

I received several more calls from Betty King 11/15-17 asking whether NRC would need certain specific documents, which were quite voluminous. I explained I would contact her about these upon Dr. Wright's return. On Wednesday, 11/17, Ms. King called to inform me she was now also copying all Rockwell reports and ordering all hardback books for NRC per the instruction of the "Licensing" group, Mr. Fitch's office. Since we are already in receipt of the Rockwell reports, I contacted Mr. Justus, in Dr. Wright's absence. We called Mr. Squires who reaffirmed that his staff would send those documents NRC specifically requests. This was again discussed by Squires with Dr. Wright on Monday in Washington state. He did not know Rockwell was undertaking this task and was glad it was brought to his attention. He said he would call Rockwell to straighten this out. I called Betty King back to inform her of our conversation with Mr. Squires. (She mentioned most of the copying has already been completed.)
