Subject: Re: Next Backfit Panel Mtg - ANO fire protection

Karla,

I wouldn't send anything to the panel without your approval. You're the BACKFIT GURU! I'm just an inspector, and this is my first backfit issue.

The letter isn't ready. I hope to have it drafted by the end of the day. (To tell the truth, I've been preparing to lead a PI&R inspection in RII, writing the SONGS FP inspection report, and preparing for the SONGS exit and RIV mgt debrief both of which are today). How many days before the panel meeting do the panel members need to have the letter? Do you think we'll have the panel next week? (backfit guru questions) It would help me to have a ballpark idea of when the letter has to be completed. I need to know if I have to work this weekend, so that I can get pre-approval for OT.

Do we need to write another memo to the EDO to let him know where we are with this issue and what we're planning to do next? (backfit guru question)

I have done some work on this issue while you've been gone. For instance, to address some of the NRR Projects folks' concerns and suggestion that we try to talk with NRC inspectors that performed FP inspections at ANO.

I'm glad you're back.

Rebecca
