Subject: conf call with DC

When are you available to participate in a conf call with DC? They want to talk about the status of our URIs:

- (1) ASD inada proc - SDP color - we're not done, yet, but this gives us an opportunity to ask for any additional info we might need.
- (2) MOV stall torque - validity of their calc methodology - apparently they tested and validated the calc
- (3) man acts in III.G.2 areas - compliance issue - [REDACTED] *ETS*

I am available today, tomorrow, and all next week. What's your availability? Do you think we could should Tom Scarborough to call in?

CC: Johnson, Claude; Marschall, Charles
