Mr. O. L. Olson, Project Manager Basalt Waste Isolation Project Office Department of Energy Richland Operations Office P.O. Box 550 Richland, Washington 99352  Dear Mr. Olson:  Thank you for your letter of February 18, 1983, which forwarded the 189 references I requested on November 24, 1982. I am return set of microfiche (BNWL-2119) which came in one box of documents not related.  I have attached a copy of your list of the 189 references, which annotated to show the documents we have received. By our count, documents have not been received: of these 5 are indicated by for be in reproduction, 4 are under consideration for availability, not listed in the SCR as references. The remaining 14, which are unaccounted for, are represented by circled numbers in the attact.  I have two questions. One - what is meant by "under consideration availability"? We find it difficult to understand how any SCR recan be considered to be not available. Second - when can the unaccounted-for 14 can be sent to us. Kindly refer any question	WM-10 (101.2)— WMHT r/f
