PROJECT WM-10

Mr. O. L. Olson  
U. S. Department of Energy  
Richland Operations Office  
BWIP Project Office  
P. O. Box 550  
Richland, WA 99352

Dear Mr. Olson:

Thank you for your letter of April 27 with the status of the 26 Site Characterization Report references.

Now that we are getting to the end of the road on references for the BWIP Site Characterization Report, it might be appropriate to look ahead to reference availability for the future Site Characterization Plan. We are prepared, of course, to obtain references cited in the Plan that are generally available, as from libraries, government agencies, the National Technical Information Service, and the like. However, a problem may arise, as with the Site Characterization Report, with other references of limited distribution, such as--reports that are not yet released when the Plan is published, internal memoranda, foreign references and state publications of limited distribution. We believe that these will need to be made available to us by DOE when the Plan is published.

David Squires tells me that this matter is already under discussion with Rockwell. The purpose of this letter is to let you know of our interest and to ask that you identify the references that will be supplied by DOE when the SCR is released.

Sincerely,

ORIGINAL SIGNED BY

Robert J. Wright  
Senior Technical Advisor  
High-Level Waste Technical  
Development Branch  
Division of Waste Management

cc: Mark Frei, DOE HQ
