Occinergence criterion 1.0000E-03
Operatry correction factor for wigner rational approximation 1.350E+00
          3q array has
4q array has
                               6 entries.
                               66 entries.
           5g array hos
                               6 entries.
           60 array has
                                4 entries.
           7g array has
                                4 entries.
                                4 estries.
          80 array has
          90 array has
                                4 entries.
                               66 entries.
          10q array has
On ixing table
                                4 entries.

BOST locations of 20000 secilable are required to make a new master containing the self-shielded values.

On nuclides in your problem have borderente factor data forms will copy from logical 12 to logical 1

Occpy 999 1/v cross sectio from log 12 to log 1 borderente trigger 0

Occpy 1001 hydrogen from log 12 to log 18 borderente trigger 0

 Othe reaction 50100 to 30070 was not used, because 50100 is not in library., (in subr pool)
 in the search of Library number 3
 Othe reaction 50100 to 40000 was not used, because 50100 is not in library., (in subr pool)
 in the search of Library number 3
 Othe reaction 50110 to 40090 was not used, because 50110 is not in library., (in subr pool) in the search of library number 3
 Othe reaction 50100 to 40100 was not used, because 50100 is not in library., (in subr pool)
 in the search of Library number 3
the search of thereby flacer 3

Othe reaction 80%0 to 80%1 has not used, because 80%1 is not in library., (in sub-pool)
Othe reaction 62%70 to 62%71 has not used, because 62%71 is not in library., (in sub-pool)
Othe fission product transitions for 92%0 here not used. library fissile ruclides are
92%30 92%30 92%30 92%30 92%30 92%30 92%30
One substitute ruclide in block 8 data. or, update with rea fission yield data.
Othe reaction 92%30 to 92%1 has not used, because 92%1 is not in library., (in sub-pool)
Othe final resolution 92%30 to 92%51 has not used, because 92%51 is not in library., (in sub-pool)
Other final resolution for 92%30 to 92%51 has not used, because 92%51 is not in library., (in sub-pool)
 Othe fission product transitions for 952570 were not used. Library fissile ruclides are 92230 92280 92380 92280 92390
 One substitute nuclide in block 8 data. or, unders with rew fission yield data.

Othe rection 92270 to 92271 was not used, because 92271 is not in library., (in subr pool)

Othe fission product transitions for 94280 were not used. Library fissile nuclides are

92230 92250 94240 92230 94230
 One substitute ruck de in block 8 data, or, update with rew fission yield data.

Othe reaction 942380 to 942381 was not used, because 942381 is not in Library., (in subr pool)
Othe fission product transitions for $2200 were not used. library fissile ruclides are 92330 $2250 $2300 $2250 $2300 $2250 $2300 $2250 $2300 $2250 $2300 $2250 $2300 $2250 $2300 $2250 $2300 $2250 $22
 One substitute ruckide in block 8 data. cr., update with new fission yield data.
Other fission product transitions for 952410 were not used. Library fissile ruckides are
92230 92250 92410 92280 92390

 "scale system control module see2 library"
 used a time-dependent resulton spectrum, for each of the above passes pass 0 applies start-up fuel densities pass n applies mid time densities of nth library interval first library updated was...
 prelia lur origens binary sorking library-id = 1143
made from modified card-image origens libraries of scale 4.2
data from the light element, actinide, and fission product libraries
 docay data, including game and total energy, are from entitle-vi
 nautron flux spectrum factors and cross sections were produced from
the "presse2" case updating all ruclides on the scale "burrup" library
 fission product yields are from endf/b-v
 photon (libraries use an 18-energy-group structure
 the photon data are from the mester photon data base,
 produced to include bremestrahlung from us2 metrix
 see information above this box (if present) for later updates
