*EDO*

Bill, please see the attached e-mail. Was this material approved for posting to the web site by the NRR review team? I'm concerned about the implications for this since we still have not received the Chairman's vote on the criteria...

We are presently checking into the Tech Spec. issue to see if there is a problem.

*NRR release*

The release of these NUREGS was a conscious decision and they have been reviewed and approved by NRR for release on the public web site. In regard to the ADAMS issue NRR suggests we wait until InfoReview meetings scheduled for next week occur to gain alignment with all effected parties.

Mike -

Hope you had a nice holiday!

Tried calling Carl, but I don't think he is in today, so I thought you should see the attached message from Tom Smith (Chief of the PDR). He noticed the Tech Specs up on the site and remembered that they had been pulled from ADAMS as "sensitive."

One of the top priorities that Carl had enumerated was getting the Improved Tech Spec pages back up, so I assumed everyone in NRR was OK with posting them. They can be viewed at <http://www.nrc.gov/reactors/operating/licensing/techspecs.html> (Note - we have a minor format problem with one of the tables that is in the process of being fixed).

If the Tech Specs are OK to leave up, we should restore them in ADAMS. In any event we need to be consistent. Please advise. You can reach me on 6921 or 7545.

Carl.....Please see the attached e-mail). The STS were removed early in the process (10/25/01) and appear in the *Log of OCIO Response to Requests from Agency ....* (ADAMS #ML012710567). They've reappeared on the web site. Should they be there?
