 The inspection reports issued recently should be in ADAMS (but there has been some past problems with them actually showing up). In any case, the A/E inspections would pre-date ADAMS and so they would need to come from the PDR (or in INPOs case, they could get them from the licensees). We hope that the ROP pages will be back up when the redesigned web site comes up in the Dec time frame. The web site did not go back to the A/E era either since they were related to the revised ROP.

 Bill, please see the attached e-mail exchange with Scott Morris, OEDO. Can you tell us whether these inspection reports are being released by NRR?

Mindy...can you help me find the answer to this one?

Scott

Subject: Availability of NRC Inspection Reports

Scott, with the NRC web site down, I've been asked how we can gain access to NRC inspection reports. In particular, our Engineering Department wants to obtain all of the Architect/Engineer inspections that were done a number of years ago. Can you direct me to the right person?
