Subject: Fwd: Sensitive Info Screening Update

Mike, I thought you might be interested in this e-mail from Chet Poslusny, NMSS, who is involved in writing the Private Fuel Storage EIS. As you can see, NMSS has been actively trying to develop criteria that we can use for this EIS and other documents we must process right away, before the Commission formally acts on the criteria sent up last month. I thought it might have information you can use in developing your EIS.
