Subject: NEI Fire Protection Information Forum

The annual NEI Fire Protection Information Forum will be held this year in Baltimore September 14-17. Hotel information and a registration form are attached.

Early registration and a reception will be held on September 14 (Sunday evening); the Forum proper will start on Monday morning September 15 as usual and conclude before noon on Wednesday September 17 (the EPRI fire modeling workshop will begin the afternoon of September 17). At this Forum we are planning to include two embedded workshops (part of the Forum registration fee, no additional charge). The first will be on circuit failures issue closure; the second on manual actions implementation. I anticipate that the circuit failures workshop will be Tuesday morning and the manual actions workshop Tuesday afternoon. Both will include breakout sessions for smaller-group questions and discussion. The details of topics to be addressed and the speakers are being worked out.

The remainder of the forum will cover other current fire protection regulatory and plant experience topics. A preliminary program should be available shortly.

Please let me know if you have any questions.

Fred Emerson
