Subject: Review of NRC's Website *-NRR*

The ET has been informed of the initial review performed by NRR and NMSS staff regarding web information that could be considered sensitive in the wake of the September 11 events. They would like those staff to continue their review and identification of **specific documents** that could reveal potentially vulnerable information. NRR reviewers (Steve Alexander and Charles Hendren) should send their recommendations to David Matthews for senior level review. The NMSS reviewer (Barry Mendelsohn) should send his recommendations to Susan Frant and Pat Rathbun for their review. Once those senior level managers recommend removal of a document/page, please forward that recommendation to me as soon as possible. I will then pass the info to the ET who will make the final decision on which information should be removed from the site. Thanks for all of your cooperation and hard work.
