Subject: Fwd: SRM - COMSECY-01-0030 - Guidance to Staff on Release of Info to Public

Good morning ladies,

We just received the final SRM which was issued late Friday (attached). No substantive changes, apart from the addition of the last sentence in #2. Here is what we propose.. we will issue a memo to offices which discuss the interim measures being performed until final guidance is sent up and approved by the Commission. The memo will also discuss info collection postings and the method we agreed on at the steering group meeting. Once the memo is sent, OCIO can send a C-note to the Commission, listing the info collections that have been approved for posting by office deputies. We should include the plant status report in the note. After it's sent, we can safely start re-posting this material. I should be able to get the memo out in a day or two.
