WITH WESTINGHOUSE TO DISCUSS PROPRIETARY INFORMATION
RELATED TO TOPICAL REPORT WCAP-16072-P (TAC NO. MB8721)

On January 12, 2004, representatives of Westinghouse met with the NRC staff to discuss proprietary material related to Topical Report (TR) WCAP-16072-P, "Implementation of Zirconium Diboride Burnable Absorber Coatings in CE Nuclear Power Fuel Assembly Designs."

The staff began the meeting with a discussion of additional information that Westinghouse would need to provide in order to resolve the staff's concerns. Westinghouse discussed the TR, how it related to previously approved TRs, and suggested that many of the staff's concerns were covered by previously approved TRs. At the end of the meeting the staff discussed their remaining concerns, along with a plan for Westinghouse to provide the additional information. Following the meeting, the staff expressed its appreciation to Westinghouse for the presentation.

An attendance list is provided in the attachment. There were no slides used during the meeting.
