Subject: Meeting tomorrow with stakeholders

I wanted to alert you to the meeting we are having tomorrow with stakeholders on a variety of public involvement issues. I'm not sure if any of you plan to attend, but I was recently informed that some issues involving SECY and OE may come up... for instance, some members of the public have requested that NRC provide early notification of enforcement actions (I'm not sure exactly how early, or what the context of this question is). Also, one of the members of the public expressed frustration that letters to the Commission are not made publicly available until after the Commission responds, thus preventing other parties with differing views from making those views known to the Commission until after the response is written. These are just examples; there may be more. I think it would be a good idea to have a rep from your office there just in case. The meeting is scheduled for tomorrow, July 22, in Room O-14B6 from 8:30 until 12:15. See attached agenda for more information. Chip Cameron is facilitating. No firm info yet on who will be attending from the public.

Thanks,
Mindy
