1. On November 13 and 14, 1984, I attended quarterly meetings between the OLRs and the Division of Waste Management Staff. Discussions with the Section Leaders and the Project Managers were held on preparations for EA reviews and the role of OLRs in these reviews. A draft copy of the Agreement concerning the NRC On-Site Reps for the Repository Projects during the Site Investigation and characterization was reviewed and comments were discussed with Cook, Coplan, Parr, and Prestholt. A marked up copy of the agreement was left with Parr.

Attended the weekly "Salt Team" meeting and gave a presentation on changes in the Chapter 6 of most recent draft of the seven salt EAs.

Issue Management System Development was discussed with Bender. It was pointed out to Bender that as a site representative my role is to identify concerns that relate to potential licensing issues and convey these concerns to the Division Director and other shaft members at the Head Quarters. Issue management system would be more useful at the Project management than out in the field.

A brief discussion on visits to DOE High Level Waste Repository Projects to review Quality Assurance Programs was held with Kennedy. He told us that the Review Team will not consist of all the three site reps at each of the projects. It would be useful to have all three of us as members of the Review Team on these visits. It would provide us with an opportunity to learn about the QA programs at the other projects.

2. On November 15 and 16, 1984, I attended the Eighth Bimonthly Meeting of Salt States and NRC. Topics on the agenda for the meeting included: Status of Draft EAs, DOE-States Interaction. During the EA comment period, Management of Salt Piles, SocioEconomic Studies, and State Grants. Representatives from the states of Louisiana and Mississippi asked for NRC's visit to their states.
