SUBJECT: NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT - COOPER
NUCLEAR STATION (TAC NO. MC1914)

Dear Mr. Edington:

The Commission requested the Office of the Federal Register to publish the enclosed "Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing."

This notice relates to your amendment application dated January 30, 2004, which would add a temporary note to the Technical Specifications (TS) to allow a one-time extension of a limited number of TS Surveillance Requirements (SR). The temporary note states that the next required performance of the SR may be delayed until the current cycle refueling outage, but no later than February 2, 2005, and it expires upon startup from the refueling outage. With the exception of one SR, the period of additional time requested occurs during the next planned refueling outage.

Sincerely,

/RA/
