MEMORANDUM FOR: Robert E. Browning, Director
Division of Waste Management

FROM: Tilak R. Verma, Senior On-Site
Licensing Representative
Salt Repository Project Office

SUBJECT: SRP SITE REPORT FOR THE WEEK of
OF JULY 16, 1984

UUL 191984

1. In SRPO's regular weekly staff meeting on July 16, 1984, Neff mentioned that Rusche is emphasizing the need for standardization of test procedures for technical areas that are common to all the projects. Technical coordination groups consisting of technical staff from HQ, BWIP, NNWSI and SRPO are being formed for areas of common activity. These groups will meet once a month. The place of meeting would rotate among the three projects and the HQ. I wonder if we (the site reps) could attend these meetings.
2. Louisiana State University is storing Gulf Region salt cores. This contract expires September 30, 1984, and will not be renewed. If anyone is interested in examining these salt cores, we should make a formal request to DOE/SRPO before these are shipped elsewhere. It may take several months after the move begins to have these salt cores available for NRC's review.
3. SRPO does not plan any field trips to WIPP. Neff mentioned to me that NRC should make their own arrangements if they want to take a tour of WIPP.
