(Return to WM, 623-SS) \_\_\_\_\_ C2

I would like to request approval for a meeting to discuss the design and organization of accelerated test programs and related statistical techniques. This meeting would involve Mr. Cote and Dr. Thomas of ONWI and Dr. Feder and other appropriate members of the NRC Waste Package project team at BCD.

Discussions would be limited to an exchange of technical information which would be available upon request to any other government contractor.

As shown in the attached memorandum, ONWI has no objections to such discussions with the limitation given above. Thus, I would appreciate your concurrence so that the subject discussion can be held.

Subject Request for Discussion with NRC Contractors

This will respond to your memorandum of January 7, 1983 which requests permission for Paul Feder, a BCD staff member, to meet and conduct discussions with Roger Cote of ONWI and Ralph Thomas, an ONWI consultant, regarding accelerated testing methodologies. We have no objection to such discussions provided they are limited to an exchange of the type of technical information outlined in your memorandum which would be available upon request to any other government contractor.

Subject Discussion by BCD staff with ONWI  
regarding accelerated test plans  
for Canister Experiments

Paul Feder, a BCD staff member on the NRC Program on Long-Term Performance of Materials Used for High Level Waste Packaging, has requested a meeting with Roger Cote of ONWI and Dr. Ralph Thomas, ONWI's expert consultant on accelerated testing methodology. Mr. Feder would like to discuss the design and organization of an accelerated test program at Sandia to study factors associated with canister corrosion and the various statistical methodological techniques that Mr. Cote and Dr. Thomas are developing and utilizing.

Discussions would be limited to an exchange of technical information which would be available upon request to any other government contractor.

This is to request approval for such a meeting for discussions between Mr. Cote and Dr. Thomas of ONWI and Mr. Feder and other appropriate members of the NRC project team.
