Dear Mr. Miller:

REQUEST FOR INFORMATION

Over the past several months, you have asked for a number of different kinds of information and we have modified our system to produce reports which will keep you informed on an ongoing basis. We need the reciprocal information from you and therefore request that you provide the Salt Repository Project of DOE with the following:

- periodic updates on information on ongoing NRC and NRC contractor work (analogous to our Catalog)
- periodic information about completed NRC and NRC contractor updates on completed work (analogous to our Bibliography and preferably keyed to our Work Breakdown Structure)
- data published separate from analyses
- a listing of which NRC regulations, reg. guides, etc. currently existing and written for power plants may be applied to nuclear waste repositories
- a listing of items in your public document room relevant to the NWT Salt Repository Project
- your current organization chart and updates on a timely basis as changes occur
- your agreements with other NRC offices (e.g., RES, I&E, etc.) so that when we correspond with you, we can be assured you speak for NRC as a whole.

 PDR WASTE  
 WM-16 PDR

109 315

We are also working to put reciprocal language into the Project Agreements currently being negotiated between DOE and NRC.

Sincerely,

*for*   
J. O. Neff  
Program Manager
