Publication of BAW-10186(P)(A), Revision 2, "Extended Burnup Evaluation"

Ref.: 1. Letter, Herbert N. Berkow (NRC) to James F. Mallay (Framatome ANP), "Safety Evaluation of Framatome ANP Topical Report BAW-10186P-A, Revision 1, Supplement 1, 'Extended Burnup Evaluation' (TAC Nos. MB3650 and MB7548)," June 18, 2003.

In Reference 1, the NRC accepted topical report BAW-10186(P)(A), Revision 1, Supplement 1, "Extended Burnup Evaluation," for referencing in license applications and requested that Framatome ANP publish proprietary and non-proprietary versions of the report. One proprietary version and one non-proprietary version are provided on the enclosed CDs.

The published report is constructed in accordance with procedures established in NUREG-0390. The document that was approved by this safety evaluation consisted of Supplement 1 only because the base document had already been accepted by the NRC. To facilitate future use of this material, however, the entire topical report is being provided herewith.

Framatome ANP is reviewing its backlog of approved topical reports to help ensure "A" versions have been issued and to more consistently attain the goal of publishing approved reports within three months of acceptance.

The affidavit provided with the original submittal of this topical report satisfies the requirements of 10 CFR 2.790(b) to support the withholding of the proprietary version of the report from public disclosure.

Very truly yours,

James F. Mallay, Director
Regulatory Affairs
