THRU:

Hubert J. Miller, Chief  
High-Level Waste Technical  
Development Branch  
Division of Waste Management

FROM:

Robert J. Wright  
High-Level Waste Technical  
Development Branch  
Division of Waste Management

SUBJECT:

NRC/BWIP INFORMATION EXCHANGE

As indicated by memorandum of July 26 (attached), a telecom system for technical interaction is now in effect between named BWIP and NRC individuals.

By telefax (copy attached), I have received draft guidelines, proposed by DOE, to cover the technical interaction system. These will be discussed with BWIP representatives during a technical management meeting here on August 4-5.

PROJECT WM-10

JUL 26 1983

MEMORANDUM FOR: BWIP Group Coordinators -- Boyle, Cook, Greeves, Justus, Knapp, Prestholt, Verma

FROM: Robert J. Wright  
High-Level Waste Technical  
Development Branch  
Division of Waste Management

SUBJECT: TECHNICAL INTERFACES WITH BWIP

To streamline the flow of technical information between BWIP (both DOE and RHO) and NRC, communicators have been designated for each main study topics, as shown on the attachment. As communication needs are identified for other topics, e.g. environmental matters, additional individuals will be nominated.

Guidelines governing this arrangement are in preparation. In the meantime, and in the interests of moving forward, Olson and I have agreed to put the interaction system into action now. When the guidelines are issued, I expect they will include the following provisions:

- Telephone calls are to be placed and accepted between the named individuals for the respective study topics.
- The calls are to deal with free exchange of information, questions, opinions and other consultation.
- The calls are not to set technical or policy positions.
- Upon completion of a call, the NRC communicator must complete and file a telecon report, with copies to Bell, Miller, myself, the section leader (as appropriate), and other group coordinators who may be interested. Copies will automatically go to the PDR.
