**SUBJECT: ERRATA LETTER FOR BROWNS FERRY NUCLEAR PLANT - NRC
INTEGRATED INSPECTION REPORT 05000260/2003005 AND
05000296/2003005**

Dear Mr. Scalice:

We have become aware that the subject letter, which issued the Brown's Ferry Integrated Inspection Report on January 26, 2004, did not reference the correct year, and was incorrectly dated January 26, 2003. The ADAMS Accession Number for that document is ML040270002. Please substitute the enclosed amended page into all copies of the subject Integrated Inspection Report. We apologize for any inconvenience caused by this error.

Should you have any questions concerning this matter, please contact Stephen J. Cahill at (404) 562-4520.

Sincerely,

/RA/

Stephen J. Cahill, Chief
Reactor Projects Branch 6
Division of Reactor Projects

**SUBJECT: BROWNS FERRY NUCLEAR PLANT - NRC INTEGRATED INSPECTION
REPORT 05000260/2003005 and 05000296/2003005**

Dear Mr. Scalice:

On December 27, 2003, the US Nuclear Regulatory Commission (NRC) completed an inspection at your operating Browns Ferry Unit 2 and 3 reactor facilities. The enclosed integrated quarterly inspection report documents the inspection results, which were discussed on January 16, 2004 with Mr. Ashok Bhatnager and other members of your staff. Results from our inspection of your Unit 1 Recovery Project are documented in a separate Unit 1 integrated inspection report.

The inspection examined activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

This report documents a self-revealing finding of very low safety significance (Green) which was determined to involve a violation of NRC requirements. However, because of the very low safety significance and because the finding was entered into your corrective action program, the NRC is treating the finding as a non-cited violation (NCV) consistent with Section VI.A of the NRC Enforcement Policy. If you contest any non-cited violation in the enclosed report, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555-0001; with copies to the Regional Administrator, Region II; the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC Resident Inspector at the Browns Ferry Nuclear Plant.
