Dear Jim:

I realized as I just finished talking to you that I wanted to ask another question. Is there some way that I could get a copy of the NRC's QA Program for their work on the high-level waste repository program? I am trying to come up with a quality assurance program that will not have most of the problems I have seen with other programs, so I'm trying to cover all the bases now before I commit the office to too much in our QA program.

If you can help me with this request, I would greatly appreciate it. See you in Germantown next month.

Sincerely,

Susan W. Zimmerman, Geologist
Nuclear Waste Programs Office
