

01/21/04

Honorable Nils J. Diaz

Chairman

U. S. Nuclear Regulatory Commission (NRC)

Washington, D. C. 20555

Dear Mr. Diaz,

Hi! My name is Mirian Gallego. I write this letter because I need your information about the Indian Point closing. I am student of Ossining High School. In class I learn about the nuclear Indian Point. In class I speak about why it should be closed.

I write this letter because I think it is a very good idea to close Indian Point nuclear power plant. I think closing Indian Point would create "a very serious reliability problem" for New York City's electricity supply. Closing Indian Point would increase electricity prices by an average of 25%, and occasionally up to 130% in some areas! "New York remains headed toward a very serious power shortage unless it acts immediately. In the long term, New York needs to bring a 700-megawatt plant on-line every year to keep up with demand." This information is of close Indian Point. org. I want for energy future good health for people.

Mr. Diaz, I write this letter because it is important and also because I want to learn more about Indian Point Nuclear Power Plant. Thank you for reading my letter and I hope you understand my words. Mr. Honorable Diaz I wish will have a good day.

Sincerely: Mirian Gallego

Mirian Gallego
