SUMMARY

I contacted Mr. Thompson to inquire about the status of preparations for the BWIP Hydrology Data Review scheduled for December 2-5, 1986. Mr. Thompson informed me at preparations for the Data Review are going smoothly. I indicated NRC's preference that DOE-BWIP introduce the data to be reviewed at the Data Review to orient reviewers to the information. This orientation should only last a couple of minutes and is not to cover interpretations or reasons for conducting the tests. Mr. Thompson stated that efforts will be made to provide the procedures used to collect the data that will be reviewed in the Data Review. I also asked Mr. Thompson about the availability of three additional types of information: (1) drill and test data analyzed by SAI, (2) transducer responses analyzed by Oregon State, and (3) any data resulting from laboratory testing of the basalts to estimate hydraulic parameters. Mr. Thompson stated that he would check into the availability of the information outside of the Data Review (It is not NRC's intention to include these data in the Data Review, at this time). Mr. Thompson requested a copy of the review of SD-BWI-TI-303 prepared by NWC and transmitted to NRC on June 13, 1986. I agreed to supply the review.

ACTION REQUIRED

Provide DOE-BWID with a copy of NWC's review of SD-BWI-TI-303 at the Data Review. Provide details about Creston site visit to Mr. Thompson when confirmed with NRC/RES.

NAME OF PERSON DOCUMENTING CONVERSATION	SIGNATURE	DATE
Michael F. Weber	<i>Michael F. Weber</i>	11/13/86

ACTION TAKEN

Review will be provided to DOE-BWID at the Data Review. Details about Creston site visit will be relayed to DOE when available before the Data Review.
