

COMMISSIONER  
U.S. NUCLEAR REGULATORY COMMISSION

Dear Congressman Hastings,

8/28/01

Recently, I had the opportunity to visit the Columbia Generating Station, WNP 1, Framatome Fuels ANP, and the U.S. Ecology low level waste disposal facility during a trip I made to Richland, Washington.

Overall, I believe these were informative and positive visits, and I would be pleased to personally brief you on my impressions.

I will have my staff contact you scheduler in the next few days to see when there is a convenient time to meet.

Sincerely,

B/B
