

Jeb Bush
Governor

John O. Agwunobi, M.D., M.B.A.
Secretary

February 16, 2004

Eric Weiss, Chief
Emergency Preparedness and Health
Physics Section
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Weiss:

This is in response to the January 23 letter from Paul Lohaus of the U.S. Nuclear Regulatory Commission (NRC). His letter advised states with commercial nuclear power plants, that the NRC would provide on request, a supply of 65 mg potassium iodide (KI) tablets to supplement current supplies of KI for the general public.

We would like to request the NRC to provide two 65 mg KI tablets for each person in the 10-mile emergency planning zone of Florida's three nuclear power plant sites. The following is the requested information about Florida's sites. The population numbers include the resident population and an estimate of the transient population during peak times:

- Florida Power and Light – Turkey Point Nuclear Power Plant (10-mile population: 160,000)
- Florida Power and Light – St. Lucie Nuclear Power Plant (10-mile population: 210,000)
- Florida Power Corporation – Crystal River Nuclear Power Plant (10-mile population: 22,000)

The contact person authorized to receive the KI and the "ship to" address is as follows:

Harlan Keaton, Environmental Administrator
Bureau of Radiation Control
2044 All Children's Way
Orlando, FL 32818

If you have any questions or need additional information, please contact me at (850) 245-4266.

Sincerely,

A handwritten signature in cursive script that reads "William A. Passetti".

William A. Passetti, Chief
Bureau of Radiation Control
NRC State Liaison Officer
