Subject: Re: List of meetings

for NMSS the list of meetings for the next month are all type 3 except for the meetings with NFS at Erwin which might be considered type 1. However, because of the level of public interest in this licensee, we will probably do more public preparation for these meetings.

Mindy,

My assignment from the last meeting was to compile a list of meetings that the Region held during the past year. The purpose was to QA the list of meetings that the Task Force had compiled.

The good news is that we have captured the type of meetings as listed in the meeting minutes. However, there are a couple of examples that could be added to make the lists more illustrative.

First, another example of NRC meetings with licensees is "management meetings." Topics include technical issues, licensing issues (compliance rather than amendments currently in the list), and decommissioning.

Another example under NRC meetings with the public is "High visibility issues at plant/site." The best example is the missing fuel rods at Millstone.
