FROM: Lynn Frank, Director

SUBJECT: Schedule for Tour of Nuclear Waste Activities

83 SEP -6 P3 27

WM DOCKET CONTROL CENTER

People on the attached distribution list are scheduled to tour the nuclear waste activities at Hanford and/or the Nevada Test Site. We were able to accommodate all requests for participation by the public and we have forwarded the security information to the U.S. Department of Energy (U.S. DOE).

Hanford: We will meet at the Pasco airport lobby at 8 a.m. on September 12 where we will board vehicles provided by U.S. DOE. We will receive briefings on the transportation and disposal of commercial spent nuclear fuel and tour the near-surface test facility and the exploratory shaft site.

U.S. DOE will provide box lunches. We will return to the Pasco airport by about 3 p.m.

Nevada Test Site: We will meet at the U.S. DOE downtown office (2753 South Highland) at 6:30 a.m. on September 13 where we will board vehicles provided by U.S. DOE. We will receive briefings on the transportation and disposal of commercial spent nuclear fuel and tour the spent fuel handling facility and the deep geologic test facility.

Lunches can be purchased at the cafeteria on the test site. We will return to the U.S. DOE office by about 5:30 p.m.

Please note that this is an opportunity for the EFSC to gather information on commercial spent nuclear fuel. Due to the tight schedule and the group sizes, please allow the EFSC members to fully explore their concerns before making any inquiries of your own. It would be inappropriate to engage in debates with those making presentations. Further, EFSC has no charter or jurisdiction over activities related to nuclear weapons. Questions about those activities will not be entertained because they would distract from the purpose of EFSC's tour.
