Subject: Sensitivity Cases

Troy - I ran the following cases for you:

Case 1: ICW and AC power set to .1(or nominal if higher), EFW set to 0.26 (this is the value from our spreadsheet bottom number), Feed and bleed to 0.32 - this gives a CCDP of 5.4E-03 *5.4E-03*

Case 2: ICW and AC power set to .55, EFW set to 0.6, Feed and bleed to 0.55 - this gives a CCDP of 5.4E-02 *5.4E-02*

I will also fax the Feed and bleed spreadsheets as soon as I can walk down the hall.

Thanks
